PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented core backend systems for dynamic content resolution and delivery, processing over **3.5 billion requests** per month.
- Defined and evolved **APIs and schemas** for a content platform, ensuring long-term stability and enabling billions of requests per month.
- Engineered deterministic, **cache-aware execution pipelines** with strong performance guarantees, reducing average response times by **22%**.
- Owned the operational reliability of production systems, including **observability, debugging**, and incident response for critical services on **AWS**.
- Collaborated with product managers and engineers to integrate new services into a high-performance ecosystem, shipping features within **3-week sprints**.
- Developed and maintained **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, System Design, Performance Optimization, Maintainability

Cloud & Infrastructure – AWS, Docker, Kubernetes, Terraform, CloudFlare

API & Data Modeling – Schema Design, Versioning Strategies, Content Modelling, GraphQL

Programming Languages – Java, Python, TypeScript

Databases – PostgreSQL, MySQL, Oracle

Observability & Reliability – Observability, Debugging, Incident Response, Splunk, Dynatrace, CloudWatch

Methodologies – Agile, Scrum, CI/CD, Jenkins, Git

PROJECTS

Content Delivery Pipeline Optimization (HCL Technologies)

- Engineered a Java Spring Boot-based pipeline to manage content resolution and delivery, processing **~2.8 billion requests** monthly.
- Implemented caching strategies and deterministic execution logic to improve system performance, achieving a **18% reduction** in p95 latency.
- Collaborated with operations teams to integrate new monitoring tools, enhancing system observability and reducing incident triage time by **30%**.

Enterprise Data Integration Service (HCL Technologies)

- Developed a **RESTful API service** using Java Spring Boot to integrate disparate enterprise business systems, including ERP modules.
- Designed and implemented robust data transformation and validation logic, ensuring data consistency across interconnected systems and reducing data errors by **15%**.
- Managed change control processes for system configuration updates and coordinated UAT, ensuring smooth post-go-live support for integrated platforms.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
