PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Facilitated workshops and requirement walkthroughs with business SMEs to define target-state processes and user journeys for the transformation programme, ensuring alignment with strategic outcomes.
- Authored UAT strategies, detailed test plans, and comprehensive test scripts to validate functional and non-functional requirements, ensuring solutions met business needs and customer experience intent.
- Coordinated User Acceptance Testing cycles, managing tester readiness, defect triage, and business sign-off processes, ensuring traceability back to original requirements.
- Developed Python scripts to automate data extraction and reporting for enterprise business systems, streamlining reconciliation workflows and reducing manual effort by an estimated 15%.
- Designed and implemented REST APIs using **Java Spring Boot** for cross-system integrations, enabling seamless data flow between operational platforms and core ERP modules.
- Managed production support for enterprise applications, responding to P1/P2 incidents and performing log analysis on **Linux** systems using **Splunk** and **Dynatrace** to maintain service level agreements.

SKILLS

Business Analysis – Requirements Elicitation, Functional Specifications, Non-Functional Specifications, UAT Strategy, Test Planning, Process Improvement, Stakeholder Engagement, Agile Methodologies

Financial Services Domain – Transformation Programmes, Customer Experience, Operational Well-being, Regulatory Awareness, Data Needs Definition, User Journeys, Business Process Management

Technical Skills – Java, Spring Boot, Python, SQL, REST APIs, Linux, Splunk, Dynatrace, Jenkins, Git, Docker

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, ETL, Data Warehousing

Enterprise Systems – ERP Integration, CRM Tools, Workflow Automation, Enterprise Platforms

PROJECTS

Transformation Programme Requirements Elicitation (HCL Technologies)

- Led the elicitation and documentation of business requirements for a multi-year financial services transformation programme, engaging directly with business SMEs to capture functional and non-functional needs.
- Developed detailed process maps and user journey diagrams for target-state operations, translating complex business needs into clear requirements for technology solution design.
- Facilitated regular stakeholder meetings and playback sessions to ensure alignment and manage expectations throughout the requirements definition phase, achieving consensus on 90% of key features.

Automated Reporting and Data Validation Framework (HCL Technologies)

- Engineered a Python-based framework to automate the generation of daily operational reports from PostgreSQL and Oracle databases, reducing report generation time from 3 hours to under 20 minutes.
- Implemented data validation checks within the Python scripts to ensure data integrity and accuracy for financial transaction monitoring, catching approximately 12% more anomalies than previous manual checks.
- Developed and maintained Jenkins CI/CD pipelines for the automated reporting solution, ensuring reliable and consistent delivery of critical business insights.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
