PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Analyzed financial statements and market data for over **50 corporate clients** to assess credit risk and inform underwriting decisions.
- Developed and maintained relationships with key clients and brokers, translating their business needs into tailored financial solutions and risk-aligned outcomes.
- Managed a portfolio of **15+ surety bonds**, ensuring adherence to underwriting guidelines, proper documentation, and compliance throughout the contract lifecycle.
- Monitored client financial health and market trends, identifying and mitigating potential risks across the full insurance cycle, including proactive engagement during potential claims phases.
- Collaborated with product development teams to provide data-driven input for the creation of new financial products and enhancements to existing offerings, impacting approximately **7 product lines**.
- Supported senior underwriters in decision-making processes by preparing well-researched proposals and risk assessments for various credit exposure levels.

SKILLS

Financial Analysis & Accounting – Credit Risk Assessment, Financial Statement Analysis, Accounting Principles, Risk Mitigation, Underwriting

Client Relations & Negotiation – Client Relationship Management, Negotiation, Interpersonal Skills, Prospecting, Business Development

Data Analysis & Reporting – Data Interpretation, Analytical Skills, IT Tools Proficiency, Reporting, Data-Driven Proposals

Underwriting & Risk Management – Surety Underwriting, Contract Management, Bond Management, Risk Monitoring, Compliance

Programming & Data Tools – SQL, Python, R, Power BI, Tableau, Excel

PROJECTS

Credit Risk Analysis Platform (HCL Technologies)

- Developed a Python-based tool for automating the extraction and preliminary analysis of financial data from diverse client statements, reducing manual data entry time by **40%**.
- Built interactive dashboards in **Power BI** to visualize key financial ratios, credit scores, and risk indicators for a portfolio of ~100 enterprise clients.
- Integrated with existing SQL databases (PostgreSQL) to pull historical financial performance data, enabling comparative analysis and trend identification.

Client Portfolio Risk Monitoring (MSc Applied Project)

- Performed in-depth financial analysis on a simulated portfolio of **30 companies**, assessing creditworthiness using models derived from financial ratios and market indicators.
- Utilized **R** for statistical modeling and hypothesis testing to identify key drivers of default risk within the portfolio.
- Presented findings and risk mitigation strategies to a simulated board of directors, demonstrating understanding of financial risk management principles.
