PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **CAD data** for agricultural machinery, generating updated **workshop drawings** to reflect design modifications for a team of 12 engineers.
- Authored comprehensive **user manuals** and **parts books** for farm and biogas machinery, ensuring clarity for both service technicians and end-users.
- Collaborated with cross-functional teams to refine machine concepts into manufacturable designs, focusing on improvements in performance and reliability for new product iterations.
- Managed **file structures** and **version control** for design assets within a high-performance network environment, supporting a team of 4 design workstations.
- Contributed to the development of **technical documentation**, including assembly instructions and operational guides, to support product lifecycle management.
- Participated in **Agile ceremonies** and defect tracking using **Jira**, contributing to the iterative improvement of engineering processes and documentation standards.

SKILLS

CAD Design – Solidworks, CAD data maintenance, workshop drawings, design for manufacture.

Technical Writing – User manuals, Parts books, Technical documentation, Assembly instructions.

Engineering Software – MS Office Suite, File management, Jira, Confluence.

Programming & Scripting – Python, Java, SQL.

Cloud & DevOps – AWS, Docker, Jenkins, Git.

Databases – PostgreSQL, MySQL, Oracle.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch.

PROJECTS

Design Documentation System for Agri-Machinery

- Developed a structured system for managing and versioning **CAD files** and associated **technical documentation** (user manuals, parts lists) for agricultural equipment.
- Implemented automated workflows using **Python scripting** to ensure consistency in drawing updates and parts book generation, reducing manual effort by an estimated 30%.
- Collaborated with design engineers to define standards for **technical writing**, improving the clarity and usability of documentation for field service teams.

Automated Reporting for Manufacturing Metrics

- Created automated **Python scripts** to extract and aggregate production data from various sources, generating daily reports on key manufacturing metrics.
- Designed and implemented a **data validation** process using **SQL queries** against PostgreSQL to ensure data accuracy before report generation.
- Built **dashboard mockups** in **Power BI** to visualize manufacturing throughput and identify bottlenecks, aiding in process optimization discussions.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
