PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided **Level 2 technical support** for enterprise applications, analysing and resolving **application and system issues** to maintain service availability.
- Designed and documented **application process flows** and system interactions, developing expertise to effectively troubleshoot and advise on system behaviour.
- Administered and debugged **server domains**, performing **root cause analysis** on production issues to ensure consistent application uptime and performance.
- Coordinated with **UAT departments** to support releases and deployments across various environments, ensuring smooth transitions to production outputs.
- Prepared detailed **reports on identified problems** and recommended **performance optimizations** and solutions to engineering teams.
- Managed and resolved **complex technical issues**, ranging in complexity from medium to high, to meet customer expectations and service level agreements.

SKILLS

Support & Operations – Test Support, Application Support, System Issues, Root Cause Analysis, UAT Coordination, Documentation, Reporting, Performance Optimization, Problem Solving, Technical Support

Databases – Microsoft SQL Server, SQL, Database Technologies

Web Technologies – Microsoft IIS, HTTP/s Requests

Cloud & Infrastructure – Azure, Cloud Infrastructure, IT Hardware, IT Software

Development Practices – C#, Programming Concepts, Software Engineering, Computer Science

PROJECTS

Customer Issue Triage and Resolution Platform

- Developed a Python-based internal tool to streamline the triaging of customer support tickets, categorizing and prioritizing issues based on severity and customer impact.
- Integrated the tool with existing ticketing systems, enabling faster assignment of issues to appropriate development or support teams, reducing average ticket resolution time by approximately 15%.
- Authored comprehensive documentation for the tool's usage and maintenance, facilitating its adoption by the Level 2 support team.

Application Performance Monitoring and Alerting System

- Configured and maintained monitoring tools to track key performance indicators for critical customer-facing applications, focusing on response times and error rates.
- Designed and implemented automated alerts for anomalies, enabling proactive identification of potential issues before they impacted a significant number of users.
- Collaborated with software engineers to refine alert thresholds and root cause analysis procedures, improving the speed of incident response.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
