+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed **Databricks solutions** on the **Lakehouse architecture** to process and analyze enterprise data, integrating with **AWS S3** for storage.
- Engineered and optimized **ETL/ELT pipelines** for large datasets, processing approximately **1.5TB of financial data** daily within the Databricks environment.
- Implemented **Delta Live Tables** for efficient data ingestion and transformation, enhancing data pipeline reliability and reducing processing time by **20%**.
- Applied **Unity Catalog** features and **IAM best practices** to enforce granular security governance and access control across sensitive financial datasets.
- Supported infrastructure and resource management using **Terraform**, automating the provisioning of AWS resources for data platform components.
- Participated in **Agile/Scrum** ceremonies, collaborating with cross-functional teams to define requirements and deliver data engineering features.

SKILLS

Data Platform – Databricks, Lakehouse architecture, Delta Lake, Delta Live Tables, Unity Catalog

Cloud Services – AWS, S3, Glue, Lambda, IAM

Languages & Scripting – Python, SQL, Spark programming

Data Engineering Tools – ETL, ELT, Terraform, Git

Methodologies – Agile, Scrum

Data Management – Data modeling, Data governance, API integrations

Domain – Financial services industry

PROJECTS

Enterprise Data Lakehouse Modernization (HCL Technologies)

- Architected and implemented a **Databricks Lakehouse** solution to consolidate disparate data sources for a financial services client, enabling unified analytics.
- Developed **Python scripts** to automate data ingestion and transformation processes, handling over **500 million records** per month and ensuring data quality through validation checks.
- Integrated the platform with **AWS S3** and configured **Unity Catalog** for centralized metadata management and access control, improving data discoverability for analysts.

Real-time Transaction Processing Pipeline (HCL Technologies)

- Built a scalable **ETL pipeline** using **Python** and **Spark** on Databricks to process real-time financial transaction streams, reducing latency by **35%**.
- Implemented data quality checks and monitoring using **Delta Live Tables**, identifying and resolving an average of **15 critical data anomalies** per week.
- Collaborated with business analysts to refine data models and ensure the processed data accurately supported operational reporting requirements.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
