PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Supported continuous improvement initiatives by applying **Lean tools** such as process mapping and root cause analysis to identify waste reduction opportunities across operational workflows.
- Collaborated with cross-functional teams to collect and analyse **operational data**, tracking performance metrics for energy efficiency and waste reduction to support evidence-based decision making.
- Assisted in identifying and implementing improvements that enhance **sustainability** and process efficiency within a regulated food manufacturing environment, adhering to GMP.
- Developed Python scripts for automating data extraction and reporting tasks, streamlining the generation of **operational performance reports** for business stakeholders.
- Managed incident response for enterprise applications, analysing logs using **Splunk** and **Dynatrace** to resolve P1/P2 issues within defined SLAs.
- Contributed to feature development and bug fixes for Java Spring Boot services, including the design and implementation of **REST APIs** for system integrations.

SKILLS

Lean & Sustainability – Process Mapping, Root Cause Analysis, Standard Work, Visual Management, Continuous Improvement Workshops, Waste Reduction, Environmental Improvements, Energy Efficiency, Responsible Resource Use

Data Analysis & Reporting – Data Collection, Performance Tracking, Operational Data Analysis, SQL (PostgreSQL, MySQL, Oracle), Python Scripting, ETL, Scheduled Reporting

Software Engineering – Java Spring Boot, REST APIs, Python, Linux, Git, Jenkins, Jira, Confluence

Production Support & Monitoring – SLA Management, Incident Response, Log Analysis, Splunk, Dynatrace, CloudWatch

Business Acumen – Food Safety, Quality Standards, Health & Safety, Good Manufacturing Practices (GMP)

PROJECTS

Operational Efficiency Dashboard (HCL Technologies)

- Developed a **Power BI dashboard** to visualize key operational metrics for a financial services client, consolidating data from multiple sources.
- Engineered **Python scripts** to automate the ETL process for daily transaction data, reducing manual data preparation time by approximately 6 hours per week.
- Performed ad-hoc **SQL analysis** to support business analysts in identifying root causes for transaction processing delays, contributing to a 15% reduction in average issue resolution time.

Automated Production Reporting System (HCL Technologies)

- Designed and implemented an automated reporting system using **Java Spring Boot** and **PostgreSQL** to generate daily reconciliation reports for enterprise business systems.
- Built **REST APIs** to integrate the reporting system with upstream ERP modules, ensuring seamless data flow and reducing data synchronization errors by 20%.
- Documented the system architecture and operational procedures, creating user guides that enabled the operations team to independently manage report generation and troubleshoot common issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
