PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented interface solutions for interoperability between Dedalus applications and client/third-party systems, mapping data using **JSON** and **HL7** standards.
- Generated initial 'gold-build' interface solutions for new Dedalus strategic products, ensuring seamless interoperability and adherence to **healthcare application systems** standards.
- Troubleshoot and resolved complex integration customer support issues, particularly those posing potential **clinical risk**, in collaboration with project and customer services teams.
- Developed technical analysis, design, configuration, and testing documentation for interface work packages, supporting both internal testing and **customer acceptance tests**.
- Assessed and documented requested changes for existing interface work packages, creating detailed specifications according to established **standards and procedures**.
- Collaborated with client and third-party vendors, alongside Dedalus project teams, to ensure successful integration of systems using **integration engine technology** components.

SKILLS

Healthcare Integration – HL7, ASTM, FHIR, TCP/IP, JSON, Healthcare Application Systems, Clinical Risk

Integration Engineering – Interface Design, Implementation, Configuration, Testing, Data Mapping, Integration Engine Technology, Interoperability

Technical Analysis & Design – Logical Data Models, Physical Data Models, Requirements Analysis, Impact Analysis, Technical Specifications

Software Development – Java Spring Boot, Python, REST APIs, SQL, Docker

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Jenkins, Git, Linux

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Warehousing

Agile Methodologies – Scrum, Jira, Confluence

PROJECTS

Healthcare Interoperability Solution Design (HCL Technologies)

- Developed a standardized interface solution using **Java Spring Boot** and **JSON** to enable data exchange between enterprise resource planning systems and a healthcare client's patient management platform.
- Created logical and physical data models for transaction flows, ensuring compliance with **healthcare communication protocols** and facilitating efficient data mapping for integration.
- Conducted thorough testing and documented the integration process, supporting the UAT phase with the client's operations team to validate system performance.

Automated Data Reconciliation Service (HCL Technologies)

- Engineered a Python-based service to automate the reconciliation of financial transaction data across multiple databases (**PostgreSQL, Oracle**), reducing manual effort by approximately 40%.
- Implemented robust error handling and logging mechanisms using **Splunk**, improving the identification and resolution time for discrepancies by 30%.
- Developed REST APIs using **Flask** to allow other enterprise systems to query reconciliation status and retrieve summary reports.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
