PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Built and deployed **AI agents** using **Claude Code** and **n8n** to automate inbound lead qualification, processing ~1,500 leads weekly and reducing manual triage time by **40%**.
- Operated and iterated on the **GTM automation stack**, monitoring live workflows for sales and SDR teams and resolving performance gaps to maintain service reliability.
- Managed the end-to-end rollout of new **AI tools** for revenue teams, developing comprehensive training materials and supporting change management initiatives that increased tool adoption by **35%**.
- Collaborated with Sales and SDR leadership to identify workflow pain points, translating them into automation opportunities and delivering solutions that enhanced team productivity.
- Designed and documented scalable processes and SOPs for **AI-powered workflows**, ensuring global consistency and reducing dependency on individual team members.
- Supported pipeline analysis by diagnosing performance data across the revenue tech ecosystem, identifying blockers and contributing to closing gaps between targets and actuals.

PROJECTS

AI-Powered Inbound Lead Qualification System

- Developed and deployed an automated system using **n8n** and **Claude Code** to process inbound leads from website forms and marketing campaigns.
- Integrated the AI agent with **Salesforce** to enrich lead data and route qualified leads to the SDR team, improving response times by an average of **30%**.
- Created detailed runbooks and documentation for the AI agent's operation and maintenance, facilitating seamless handover to the operations team.

Sales Workflow Automation with Python and AWS Lambda

- Engineered Python scripts deployed on **AWS Lambda** to automate repetitive tasks within the sales workflow, such as data synchronization and report generation.
- Developed REST APIs using **Flask** to enable integration between disparate sales tools, improving data flow and reducing manual data entry by approximately **20%**.
- Implemented monitoring and alerting using **AWS CloudWatch** to ensure the reliability and performance of the automated workflows.
