PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed **production support** for enterprise applications, responding to P1/P2 incidents and ensuring adherence to SLAs across systems monitored by **Splunk** and **Dynatrace**.
- Developed **Python scripts** to automate ETL processes and generate scheduled operational reports, improving data processing efficiency by an estimated **15%**.
- Performed **SQL database administration** tasks including ad-hoc querying, data validation, and schema modifications across **PostgreSQL**, **MySQL**, and **Oracle** databases.
- Contributed to feature development and bug resolution for existing **Java Spring Boot** microservices, including the design and implementation of new **REST APIs**.
- Supported system integrations and change management for enterprise business platforms, coordinating UAT and post-go-live support for interconnected systems.
- Collaborated with cross-functional operations teams to gather requirements, provide UAT support, and triage issues for a financial-services dashboard focused on transaction monitoring.

SKILLS

Core Technologies – Java, Spring Boot, Python, SQL, REST APIs, Linux, Git

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins

Databases – PostgreSQL, MySQL, Oracle

Monitoring & Observability – Splunk, Dynatrace

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

Enterprise Systems – ERP integration support, Change Management, Jira, Confluence

Domain Knowledge – Payments operations dashboard, Transaction monitoring, Reconciliation workflows

PROJECTS

Automated Data Reconciliation System (HCL Technologies)

- Developed a **Python-based reconciliation engine** to automate the matching of transaction records between two disparate financial systems, reducing manual reconciliation effort by approximately **40%**.
- Engineered data pipelines using **SQL queries** and **pandas** to extract, transform, and load large volumes of transaction data from source databases (**PostgreSQL**, **Oracle**) into a staging area for analysis.
- Implemented error handling and logging mechanisms within the Python scripts to capture discrepancies and exceptions, generating detailed reports for audit trails and operational review.

Operational Monitoring Dashboard (HCL Technologies)

- Designed and built interactive **Power BI dashboards** to visualize key performance indicators for a payments operations dashboard, enabling real-time monitoring of transaction success and failure rates.
- Extracted and transformed data using **Power Query** and applied **DAX measures** to create calculated fields for trend analysis and anomaly detection on operational metrics.
- Collaborated with business analysts to refine dashboard requirements and ensure accurate representation of data, facilitating faster identification of system bottlenecks and performance issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
