PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and deployed **Python** and **Java** services on **AWS** to detect and respond to cybercrime patterns, translating security research insights into actionable production capabilities.
- Developed **agentic systems** and **AI-powered workflows** for cybercrime research, enrichment, and automated response, reducing manual investigation effort by approximately **40%**.
- Built **SQL**-based detection logic and enrichment pipelines that process ~2,500 events per hour, identifying patterns in **phishing** and **digital identity attacks** for enhanced customer protection.
- Engineered **REST APIs** and **backend services** to convert cybercrime intelligence into scalable customer protections, ensuring rapid deployment from concept to production.
- Owned end-to-end system lifecycle: designed, built, tested, deployed, and monitored **distributed systems**, maintaining high quality and operational discipline with a focus on rapid response to production issues.
- Collaborated with security and product teams to integrate new cybercrime protections, moving from initial threat identification to shipped capabilities with minimal handoffs, improving response speed by an average of **15%**.

SKILLS

Languages – Python, Java, SQL

Cloud & Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, Docker, Linux

Backend & APIs – Spring Boot, REST APIs, FastAPI

Security & Cybercrime – Cybercrime Investigations, Phishing, Brand Abuse, Digital Identity Crime, Threat Intelligence, Agentic Engineering, AI Workflows

Data & Automation – ETL, Data Pipelines, Automation Scripting, Data Analysis, Machine Learning Fundamentals

DevOps & Tools – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Agentic Cybercrime Detection Pipeline

- Developed an **AI-native agent** using Python to autonomously investigate suspicious transaction patterns, correlating data from multiple sources to identify potential fraud rings.
- Built a **FastAPI** service to expose detection signals, integrating with downstream protection systems and reducing the average time to flag high-risk activities by **30%**.
- Designed and implemented **PostgreSQL** schema and ETL processes to support the agent's data enrichment requirements, handling approximately 1.5 million records daily.

Phishing Campaign Analysis & Response Automation

- Engineered a **Python**-based analysis tool to parse and categorize phishing emails, identifying common attacker TTPs and extracting key indicators of compromise (IOCs).
- Automated the ingestion of IOCs into a **cloud-based** threat intelligence platform, enabling faster blocking of malicious domains and IPs across the ecosystem.
- Created a dashboard in **Splunk** to visualize campaign trends and response effectiveness, providing actionable insights to the security operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
