PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed **Java Spring Boot** microservices to orchestrate **LLM-powered agents**, implementing **OpenAI specs** for client/server interactions and tool schemas.
- Engineered **tool execution** layers with built-in **retries** and **guardrails**, ensuring robust agent behavior and safe interaction with external systems.
- Built **event-driven pipelines** for agent requests, integrating **RAG** techniques for context assembly and implementing **result streaming** for real-time feedback.
- Integrated with **GitHub webhooks** and **Actions** to automate PR review processes and trigger agentic workflows for developer-focused tasks.
- Added comprehensive **observability** by implementing **logs, metrics, and traces**, creating dashboards for monitoring agent reliability and performance.
- Authored extensive **unit and integration tests** for agent services, ensuring code quality and maintaining clear documentation for service contracts.

SKILLS

Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

AI/ML Concepts – LLMs, OpenAI specs, MCP, RAG, Embeddings, Agentic Workflows, Function Calling

Cloud & DevOps – AWS (EC2/S3/Lambda/CloudWatch), Docker, Jenkins, Git, GitHub Actions

Databases & Messaging – PostgreSQL, MySQL, Oracle, Kafka/SQS concepts

Observability & Tools – Splunk, Dynatrace, Jira, Confluence, Claude, Cline

PROJECTS

AI Agent Orchestration Service for Developer Automation

- Designed and implemented a **Java Spring Boot** service to manage an **LLM agent** that automates code review suggestions by integrating with the **GitHub API**.
- Developed a robust **function calling** mechanism using **OpenAI specs** to allow the agent to interact with developer tools, processing approximately **150 requests per hour**.
- Integrated **RAG** for accessing internal documentation, enabling the agent to provide contextually relevant code improvement advice and reducing manual review time by an estimated **18%**.

Automated Data Pipeline for Financial Operations Insights

- Built a **Python** data pipeline to ingest and process transaction data from **PostgreSQL**, transforming raw logs into structured insights for an operational dashboard.
- Developed **ETL scripts** using pandas to clean and aggregate data, handling approximately **3,000 records** per batch job for reconciliation workflows.
- Created **SQL queries** for data validation and enrichment, ensuring data integrity for downstream reporting and monitoring.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
