PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for system integrations, handling approximately 1,500 requests per minute during peak loads.
- Automated data extraction and transformation processes using **Python scripting**, reducing manual reporting effort by 15 hours per week for operations teams.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes within defined SLAs, resolving over 50 critical issues.
- Designed and deployed **power flow studies** in a simulated network environment to validate system outputs against recorded measurements, identifying performance discrepancies.
- Analyzed **load flow results** and network data from GIS and SAP sources to pinpoint areas for system enhancement and troubleshoot operational anomalies.
- Collaborated with **data analytics teams** to integrate network data insights into broader business intelligence dashboards, supporting strategic decision-making.

SKILLS

Core Engineering – Java, Spring Boot, Python, REST APIs, Docker, Linux, Git, Jenkins, Jira, Confluence

Cloud & Operations – AWS (EC2, S3, Lambda, CloudWatch), Splunk, Dynatrace

Data Analysis & BI – Power BI, Tableau, R/RStudio, pandas, NumPy, scikit-learn, DAX, Power Query, Data Modelling, SQL

Databases – PostgreSQL, MySQL, Oracle

Domain Specific – Network Data, GIS, SAP, Microgeneration Data, Load Profiles, Power Systems Analysis, Load Flow Studies

Methodologies – Agile, Scrum

PROJECTS

Network Performance Analysis and Simulation Platform

- Developed a Python-based simulation tool to model network behavior under various load conditions, processing **~50,000 data points** per run.
- Integrated **SQL queries** against a PostgreSQL database to ingest historical network performance data and validate simulation outputs.
- Created interactive **Power BI dashboards** to visualize simulation results and load flow analysis, presenting key findings to system architects.

Automated Data Ingestion and Reporting for Operations

- Built automated **Python ETL pipelines** to extract, transform, and load data from multiple sources including GIS and operational logs into a central data store.
- Implemented scheduled reporting using **SQL and Python**, delivering daily operational summaries that improved issue detection turnaround time by **20%**.
- Managed data validation checks and error handling within the pipelines, ensuring data integrity for downstream analysis and system monitoring.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
