PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed **Python** backend microservices and REST APIs to support **AI agent communications** and facilitate **data exchange** with frontend applications.
- Designed and implemented **React.js** frontend components for agent monitoring dashboards, enabling real-time display of **performance tracking** and operational status.
- Maintained and troubleshooted **full-stack** applications, resolving technical issues across both **Python** backend services and **React.js** frontend interfaces.
- Collaborated with product managers and other engineers within an **agile delivery** framework to deliver enterprise-grade features in iterative **DevOps** sprints.
- Wrote clean, maintainable, and efficient **Python** and **React.js** code, prioritizing **security** and data protection in all development efforts.
- Contributed to team growth by identifying and encouraging areas for improvement in software quality standards and development **best practices**.

SKILLS

Backend – Python, Spring Boot, REST APIs, Microservices, FastAPI

Frontend – React.js, Angular, HTML, CSS

Cloud – AWS (EC2, S3, Lambda, CloudWatch), Docker

Databases – SQL, PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Jenkins, Git, Agile, Scrum, DevOps

AI/ML – AI agent communications, LangChain, OpenAI API, Bedrock

Other – Linux, Splunk, Dynatrace, Jira, Confluence

PROJECTS

AI Agent Communication Platform (HCL Technologies)

- Developed **Python** backend services to manage state and data flow for a fleet of AI agents, handling approximately 1,500 messages per hour.
- Designed and implemented **REST APIs** for agent-to-agent and agent-to-frontend communication, ensuring reliable data exchange for operational dashboards.
- Integrated basic **Docker** containerization for service deployment, streamlining the setup process for new agent instances.

Real-time Agent Performance Dashboard (HCL Technologies)

- Built interactive frontend components using **React.js** to visualize agent performance metrics and activity logs in near real-time.
- Developed data aggregation pipelines in **Python** to process and prepare logs for display, reducing raw log volume by 40% before frontend consumption.
- Collaborated with internal operations teams to gather requirements and refine dashboard features, ensuring usability for monitoring complex workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
