PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **scalable, high-performance applications** on **AWS**, supporting critical **event-driven architecture** for a global sports platform.
- Analyzed and resolved complex issues within **multifaceted systems**, improving overall performance and scalability for real-time trading operations.
- Authored **efficient, modular, and testable code** in **Java Spring Boot**, adhering to quality standards and contributing to application reliability.
- Managed the full software product lifecycle from concept through development and deployment, ensuring smooth operation and reliability of **trading systems**.
- Collaborated with **Product, Quant, and Engineering teams** to deliver stable and reliable applications, translating business needs into technical solutions.
- Enhanced software quality through a focus on **testability**, operational metrics, and comprehensive documentation for critical trading platform components.

SKILLS

Languages – Java, Python, C#

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure

Frameworks & Libraries – Spring Boot, .NET

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Splunk, Dynatrace

Methodologies – Agile, Scrum, SOLID, TDD, BDD, Domain Driven Design

Domain – Trading Systems, Risk Management, Event-Driven Architecture

PROJECTS

Real-Time Trading Event Ingestion Service (HCL Technologies)

- Engineered a **Java Spring Boot** microservice to ingest and process high-volume trading events from multiple external feeds, handling approximately **3,500 events per second** during peak hours.
- Implemented robust error handling and retry mechanisms using **PostgreSQL** as a persistence layer, ensuring data integrity and reducing message loss by **~98%**.
- Developed REST APIs for downstream services to consume processed event data, facilitating integration with risk assessment and reporting modules.

Automated Production Monitoring and Alerting System (HCL Technologies)

- Developed a suite of **Python** scripts to automate log analysis and system health checks across a fleet of **Linux** servers running enterprise applications.
- Integrated scripts with **Splunk** and **Dynatrace** to generate real-time operational dashboards and trigger alerts for critical incidents, reducing manual monitoring effort by **30%**.
- Created automated runbooks for common P1/P2 incident scenarios, enabling faster response times for the operations support team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
