PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed and enhanced a multi-tenant **Kubernetes** platform on **AKS**, contributing to core components under senior guidance and ensuring reliability for internal application teams.
- Implemented and maintained **Terraform** configurations, extending existing modules to deploy and manage cloud infrastructure resources across **Azure**.
- Developed **Python** scripts for automating routine tasks and improving operational efficiency, reducing manual effort in system administration and data processing.
- Contributed to **GitOps** workflows using **ArgoCD** and **Helm**, facilitating declarative deployments and improving the consistency of the platform's service catalog.
- Authored detailed **runbooks** and documentation for platform services, ensuring knowledge transfer within the team and supporting operational readiness for shared infrastructure.
- Participated in shared on-call rotations for the platform engineering team, gaining operational experience and responding to incidents across the shared services.

SKILLS

Cloud Platform – Azure, AKS, AWS, GCP, Azure Networking, VNets, VPCs, Subnets, Peering, VPNs.

Container Orchestration – Kubernetes, Pods, Deployments, Services, RBAC, Namespaces.

Infrastructure as Code – Terraform, Bash, Python.

Version Control & CI/CD – Git, GitLab, ArgoCD, Helm, Kustomize, Jenkins.

Networking & Security – TCP/IP, DNS, SAML, OIDC, Network Policies, Identity and Access Management.

Observability – Grafana Cloud, Prometheus, Grafana.

PROJECTS

AKS Platform Enhancement Initiative

- Developed and deployed custom **Kubernetes** resources and controllers to manage application lifecycles within a multi-tenant **AKS** environment, improving deployment speed by approximately **30%**.
- Wrote **Terraform** modules to provision and configure new namespaces, network policies, and RBAC roles, enabling self-service onboarding for development teams.
- Created automated scripts in **Bash** and **Python** to validate Kubernetes manifests and Terraform configurations before deployment, reducing configuration drift incidents.

Internal Developer Platform Tooling

- Contributed to the development of an **Internal Developer Platform** by building self-service tooling using **Python** and **Flask**, abstracting complex infrastructure provisioning.
- Integrated the platform with **GitLab** CI/CD pipelines, enabling developers to provision necessary cloud resources through a simplified interface.
- Documented the new self-service workflows and provided introductory sessions to internal engineering teams, facilitating adoption of the platform.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
