PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed multi-agent workflows using **Python** and **LangGraph**, implementing orchestrator/specialist patterns for automated task execution.
- Designed and consumed APIs for **agent skills**, integrating external tools and services into an agentic workflow system.
- Implemented context engineering techniques, including managing agent **context window** and crafting effective **system prompts** for LLM reasoning.
- Automated data validation and ETL processes using **Python scripts** and **SQL**, reducing manual data preparation time by approximately 30%.
- Contributed to CI/CD pipelines using **Jenkins** and **Git** for automated testing and deployment of new software features.
- Managed production incidents for enterprise applications, analyzing logs in **Splunk** and identifying root causes to restore service within SLA targets.

SKILLS

Languages – Python, Java, Node.js, Go, SQL, R

AI & Agentic Frameworks – LangGraph, CrewAI, AutoGen, LLMs, Prompt Engineering, Context Engineering, MCP, Agent Skills, System Prompts

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Development Practices – TDD, CI/CD, Code Reviews, Agile, Scrum

Databases – PostgreSQL, MySQL, Oracle

Observability & Tools – Splunk, Dynatrace, Jenkins, Git, Jira, Confluence

Analytics & BI – Power BI, Tableau, DAX, Power Query, pandas, NumPy, scikit-learn

PROJECTS

Agentic Workflow Orchestrator (HCL Technologies)

- Developed a Python-based orchestrator for multi-agent workflows, managing task delegation and state synchronization between specialist agents.
- Integrated LLM reasoning capabilities by implementing dynamic prompt generation and context window management for agents processing complex datasets.
- Built a set of reusable agent skills, enabling agents to interact with external APIs and databases to perform automated data analysis tasks.

Automated Reporting Pipeline (HCL Technologies)

- Engineered Python scripts to automate the extraction, transformation, and loading (ETL) of data from multiple enterprise systems.
- Designed and implemented SQL queries for data validation and aggregation, ensuring data integrity for scheduled operational reports.
- Scheduled and monitored daily report generation jobs using cron and shell scripting on Linux environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
