PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented multi-agent workflows using **Python** and **LangGraph**, orchestrating specialist agents for complex task decomposition and execution, improving process automation efficiency by **35%**.
- Developed and consumed REST APIs in **Java Spring Boot** for system integrations, ensuring seamless data exchange between enterprise applications and downstream services.
- Engineered **Python** scripts to automate data extraction, transformation, and loading (ETL) processes for scheduled reporting, reducing manual data preparation time by approximately **15 hours per week**.
- Managed production support for enterprise applications, responding to P1/P2 incidents and performing root cause analysis using **Splunk** and **Dynatrace** to maintain service level agreements.
- Wrote **SQL** queries across **PostgreSQL** and **Oracle** databases for data validation, ad-hoc analysis, and schema modification requests, ensuring data integrity for operational reporting.
- Contributed to CI/CD pipelines using **Jenkins** and **Git** for automated builds, testing, and deployments, facilitating faster release cycles and improving code review efficiency.

SKILLS

Languages – Python, Java, Node.js, Go

AI & Agentic Frameworks – LangGraph, CrewAI, AutoGen, LLM Reasoning, Context Engineering, System Prompts, Agent Customization, MCP, Prompt Engineering Evaluation, Red-Teaming Prompts

Backend Development – Spring Boot, REST APIs, Microservices, Docker, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle, SQL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Jenkins, Git, CI/CD, Linux

Observability & Support – Splunk, Dynatrace, Incident Response, SLA Management

Analytics & BI – Power BI, Tableau, DAX, Power Query, R, Pandas, NumPy, Scikit-learn

PROJECTS

Agentic Workflow Orchestration Platform (HCL Technologies)

- Developed a prototype agentic workflow system in **Python** using **CrewAI**, enabling task delegation between specialist AI agents for content generation, which reduced drafting time by **40%**.
- Implemented context engineering techniques, including prompt tuning and memory management for specialist agents, to improve the relevance and accuracy of LLM outputs by **22%**.
- Designed agent skills and customisations to integrate with external tools via REST APIs, allowing agents to fetch real-time data for more informed decision-making.

Automated Transaction Monitoring System (HCL Technologies)

- Built a data pipeline using **Python** and **SQL** to ingest and process transaction data from multiple sources, creating an operational dashboard for monitoring failed payments.
- Developed automated alerting mechanisms that triggered notifications for high-priority transaction failures, reducing the average detection time by **3 hours**.
- Integrated monitoring solutions like **Splunk** to provide real-time visibility into system health and transaction processing status for the operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
