PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **RESTful APIs** using **Java Spring Boot** for microservices, focusing on high performance and scalability, supporting an average of **1,500 requests per minute**.
- Developed and deployed **serverless solutions** on **AWS Lambda**, integrating with **S3** for data processing and reducing processing time for batch jobs by **30%**.
- Managed production systems on **AWS EC2**, providing proactive monitoring via **Splunk** and **Dynatrace**, and resolving P1/P2 incidents within defined SLAs.
- Authored **Python scripts** to automate data extraction and transformation for scheduled reporting, improving data availability to business analysts by **one day** per reporting cycle.
- Collaborated with cross-functional teams to define and uphold coding standards, contributing to a unified codebase through comprehensive **code reviews** and implementing **CI/CD** using **Jenkins**.
- Contributed to a DevOps culture by maintaining **Linux** production environments, analyzing logs, and implementing automated tasks with **cron jobs**.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP

Backend Development – Microservices Architecture, Serverless Solutions, RESTful APIs, GraphQL APIs, Java, Spring Boot, Python, .NET

Containerization & Orchestration – Docker, Kubernetes

Databases – SQL (PostgreSQL, MySQL, Oracle), NoSQL

DevOps & CI/CD – Jenkins, Git, Splunk, Dynatrace, Linux Shell Scripting

Data Processing – High-Scale Stream/Batch Processing, ETL, Data Warehousing

Methodologies – Agile, Scrum

PROJECTS

Cloud-Native Microservices Platform (HCL Technologies)

- Engineered a suite of **microservices** using **Java Spring Boot** and **Docker**, deployed on **AWS EC2** to handle core financial transaction processing, supporting approximately **2,000 transactions per hour**.
- Implemented **RESTful APIs** for inter-service communication and external data ingestion, ensuring secure data exchange with authentication and authorization mechanisms.
- Developed automated deployment pipelines using **Jenkins** and **Git**, reducing deployment time for new service versions from 4 hours to 30 minutes.

Automated Production Monitoring System (HCL Technologies)

- Developed **Python scripts** to aggregate and analyze logs from distributed systems using **Splunk**, identifying an average of **15 critical performance bottlenecks** per week.
- Built **serverless functions** on **AWS Lambda** to trigger alerts based on predefined thresholds, reducing manual monitoring overhead by **40%** for the operations team.
- Created a centralized dashboard in **Confluence** detailing incident response procedures and common troubleshooting steps for production systems, improving resolution times by **15%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
