PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and deployed **Python-based AI/LLM solutions** for scalable, real-world business use cases, focusing on production-grade system integration.
- Developed and maintained high-performance **backend systems** and **REST APIs** in **Java Spring Boot** to support intelligent applications and data flow.
- Architected and optimised **data pipelines** using **Python scripting** and **SQL** for ETL processes, supporting downstream AI model training and inference.
- Managed and scaled **AWS cloud infrastructure**, including **EC2**, **S3**, and **Lambda**, ensuring reliable deployment and operation of AI systems.
- Monitored and evaluated system performance in production using **Splunk** and **Dynatrace**, implementing improvements to enhance reliability and efficiency.
- Collaborated with cross-functional engineering and product teams to integrate **AI capabilities** seamlessly into existing enterprise platforms and workflows.

SKILLS

AI/ML – AI Engineering, LLMs, AI Frameworks, Model Deployment, MLOps, AI System Design, Prompt Engineering

Backend Development – Python, Java, Spring Boot, REST APIs, Backend Systems, API Development

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), GCP, Azure, Distributed Systems, Docker, Kubernetes

Data Engineering & Analytics – Data Pipelines, ETL, SQL (PostgreSQL, MySQL, Oracle), Data Architecture, Data Modelling, Power BI, Tableau, DAX

Tools & Methodologies – LangChain, Git, Jenkins, Jira, Confluence, Agile, Scrum, Linux, Shell Scripting

PROJECTS

Production AI System for Business Intelligence

- Developed a **Python-based AI system** to process and analyze large volumes of operational data, generating actionable insights for business stakeholders.
- Architected and implemented **data pipelines** using **SQL** and **Python** to ingest and transform data from various sources into a format suitable for AI model consumption.
- Deployed the system on **AWS**, integrating it with existing monitoring tools to ensure high availability and performance for continuous operation.

LLM-Powered Customer Support Automation

- Built and fine-tuned an **LLM solution** using **Python** and frameworks like **LangChain** to automate responses to common customer inquiries, reducing response times by an average of **40%**.
- Designed and implemented **REST APIs** in **Java Spring Boot** to serve the LLM model, enabling seamless integration with existing customer support platforms.
- Managed the deployment and scaling of the API service within a **cloud environment**, ensuring it could handle peak loads of approximately **2,500 requests per hour**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
