PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented scalable **Python** microservices on **AWS Lambda** and **API Gateway** to handle high-volume event processing, supporting approximately 4,000 requests per second during peak hours.
- Contributed to the design and development of a serverless backend architecture, integrating **DynamoDB** for persistent data storage and ensuring data consistency across distributed components.
- Developed and maintained **Python** data pipelines for ETL processes, transforming and loading data from various sources into analytical stores, reducing manual data preparation effort by **30%**.
- Collaborated with a team of 5 engineers in an Agile environment, participating actively in **code reviews**, **pair programming**, and sprint planning to deliver features on schedule.
- Investigated and resolved software defects and performance bottlenecks in production systems, improving system responsiveness by **18%** through targeted code optimizations and query tuning.
- Assisted in the continuous improvement of CI/CD delivery pipelines using **Jenkins** and **Git**, automating build, test, and deployment processes to accelerate release cycles.

SKILLS

Programming Languages – Python, JavaScript, TypeScript

Cloud Platforms – AWS (Lambda, API Gateway, DynamoDB, S3, EC2, CloudWatch)

Databases – NoSQL (DynamoDB, MongoDB), SQL (PostgreSQL, MySQL, Oracle)

Development Tools – Git, Jenkins, Docker, Jira, Confluence

Methodologies – Agile, Scrum, Object-Oriented Design, Clean Code Principles

Infrastructure – Infrastructure-as-Code (Terraform, CloudFormation)

PROJECTS

Serverless Transaction Processing System (HCL Technologies)

- Developed a **Python**-based serverless application using **AWS Lambda** and **API Gateway** to process financial transaction messages, handling approximately 3,500 events per second.
- Integrated **DynamoDB** as the primary data store for transactional records and operational logs, implementing efficient data retrieval patterns for reporting and auditing.
- Designed and implemented automated unit and integration tests for the Python codebase, achieving **85%** code coverage to ensure application reliability.

Automated Data Ingestion & Transformation Pipeline (HCL Technologies)

- Engineered a **Python** ETL pipeline to ingest data from multiple enterprise systems, transforming and loading it into a data warehouse for business intelligence reporting.
- Configured and managed **AWS S3** for staging raw data and **AWS Lambda** for event-driven processing triggered by new file arrivals.
- Wrote SQL scripts to validate data integrity post-ETL, ensuring accuracy for downstream analytical dashboards and reducing data discrepancy issues by **22%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
