PROJECTS

SAP BTP Application for Financial Operations

- Developed a proof-of-concept **SAP Fiori application** on **SAP BTP** to streamline operational alerting for a financial-services client, integrating with existing backend systems.
- Designed and implemented **ABAP CDS views** and **OData services** to expose transaction data for real-time monitoring and reporting within the BTP environment.
- Authored comprehensive technical documentation, including design specifications and deployment guides, for the new BTP-based solution.

Automated ERP Data Integration Framework

- Built a **Python-based ETL framework** to automate data extraction and transformation from multiple enterprise systems, including ERP modules and operational databases (PostgreSQL, Oracle).
- Developed SQL scripts for data validation and cleansing, ensuring data integrity for downstream reconciliation and reporting processes, handling approximately **12,000 records** per batch.
- Integrated the framework into existing CI/CD pipelines using Jenkins, enabling scheduled data refreshes and reducing manual data handling efforts by an estimated **30%**.
