PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Researched and tested **AI tools** such as **ChatGPT** and **Microsoft Copilot** for environmental service applications, documenting findings and potential business impact for management review.
- Built and improved **AI-assisted workflows** for office operations by integrating **Make** to automate data entry from digital forms into spreadsheets, reducing manual input time by approximately **40%**.
- Assisted with an **AI voice agent** project by developing prompt templates and example dialogues, contributing to the initial training dataset for customer service automation.
- Reviewed existing manual processes for pest control reporting, identifying automation opportunities and mapping out a proposed workflow using **Python scripting** to pre-process field data.
- Connected disparate systems by developing **APIs** using **Java Spring Boot** to facilitate data exchange between internal platforms and external reporting tools, streamlining data aggregation.
- Monitored AI outputs for accuracy and usefulness in a pilot project involving automated document summarization, identifying and reporting on approximately **15%** of generated summaries requiring human correction.

SKILLS

AI & Automation – AI tools, ChatGPT, Microsoft Copilot, AI voice agent, prompt engineering, automation platforms, Make, Zapier, n8n, process automation.

Software Development – Python, Java, Spring Boot, REST APIs, Docker, Git, CI/CD, Jenkins.

Data & Analytics – SQL, PostgreSQL, data analysis, data modelling, Power BI, DAX, Power Query, R, pandas, NumPy, scikit-learn, reporting tools, spreadsheets.

Business Systems – CRM, phone systems, workflow automation, business processes, documentation, Jira, Confluence.

Cloud & Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, Linux.

PROJECTS

Environmental Data Automation Platform

- Developed a **Python**-based automation platform to process incoming environmental survey data from various digital forms, transforming raw inputs into structured formats for analysis.
- Integrated **APIs** to connect the automation platform with the company's **CRM system**, enabling automated client record updates based on processed survey results, improving data consistency by **30%**.
- Created comprehensive documentation and training materials for office and operations teams on using the new automated data ingestion workflows, facilitating a smooth rollout.

AI-Powered Customer Service Assistant POC

- Built a proof-of-concept **AI chatbot** using basic **Python** and pre-trained language models to answer common customer queries regarding environmental services.
- Designed and implemented prompt engineering strategies to improve response accuracy and relevance, achieving a user satisfaction rating of approximately **75%** in internal testing.
- Developed a basic knowledge base interface that allowed internal teams to review and update AI responses, ensuring factual accuracy and adherence to company guidelines.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
