PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Conducted in-depth Enhanced Due Diligence (EDD) investigations on high-risk customers and fundraisers, assessing potential financial crime risks including fraud and AML/CFT concerns.
- Evaluated fundraiser and transactional activity to identify unusual patterns and assess associated risks, determining appropriate investigative or escalation steps with clear, documented findings.
- Gathered and analyzed information from internal systems and open-source intelligence to support risk assessments and investigative conclusions for complex cases.
- Served as an escalation point for sensitive EDD matters, providing risk guidance and subject matter expertise to cross-functional partners including Payments Risk and Legal.
- Developed and maintained subject matter expertise in platform-specific risks and financial crime typologies, contributing to the team's operational performance and adherence to Service Level Agreements.
- Drove process improvements for the EDD program by documenting investigative findings clearly and comprehensively in internal case management systems, supporting defensible decision-making and audit requirements.

SKILLS

Risk Analysis – Enhanced Due Diligence (EDD), Financial Crime, AML/CFT, Sanctions Screening, Politically Exposed Persons (PEPs), Adverse Media, Risk Assessment, Fraud Detection

Investigation & Documentation – Open-Source Intelligence (OSINT), Case Management Systems, Investigative Frameworks, Risk Guidance, Audit Requirements, Detailed Documentation

Collaboration & Communication – Cross-functional Collaboration, Stakeholder Management, Written Communication, Customer Support, Problem Solving, Critical Thinking

Technical Skills – SQL, Python, Java, Spring Boot, REST APIs, AWS, Docker, Linux, Git, Jenkins, Jira, Splunk, Dynatrace, Power BI, Tableau

Domain Knowledge – Payments Risk, Platform Abuse, Transactional Activity, Fundraiser Oversight, Compliance, Regulatory Awareness

PROJECTS

Financial Crime Risk Assessment Platform (HCL Technologies)

- Developed Python scripts to automate the aggregation of transaction data and identify suspicious patterns for review by the operational risk team.
- Designed and implemented structured data models in PostgreSQL to support efficient querying for financial crime typologies and historical trend analysis.
- Authored comprehensive documentation and runbooks detailing the data extraction, transformation, and analysis processes for regulatory audit purposes.

Enterprise Systems Integration and Monitoring (HCL Technologies)

- Supported and integrated with enterprise business systems, including ERP modules, via REST APIs and direct database integrations (PostgreSQL, Oracle).
- Configured and maintained production monitoring dashboards using Splunk and Dynatrace, enabling proactive identification of system anomalies and SLA breaches.
- Managed change control processes for system configuration updates, coordinating UAT and providing post-go-live support across interconnected platforms.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
