## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented scalable backend services and API interfaces using **Java** and **Spring Boot**, enhancing existing capabilities within a large-scale live system without customer impact.
- Developed integration infrastructure to enable third-party applications to connect with core communication capture systems, building **generic, modular API interfaces** for future use cases.
- Engineered Python scripts to automate ETL processes for data ingestion, reducing manual data processing efforts by approximately **40%** for the communications capture pipeline.
- Managed production support and incident response for enterprise applications, ensuring adherence to SLAs and performing root cause analysis on P1/P2 incidents impacting system reliability.
- Collaborated with internal product and R&D; teams to define requirements and deliver new features for the communications capture platform, taking ownership from design to production.
- Enhanced **system security** for external-facing capabilities by implementing robust authentication and authorization mechanisms, ensuring both power and security.

## SKILLS

**Languages** – Java, Python, SQL

**Frameworks/Libraries** – Spring Boot, Spring

**Cloud Platforms** – AWS (EC2, S3, Lambda, CloudWatch)

**Databases** – PostgreSQL, MySQL, Oracle

**Tools & Technologies** – Kafka, SQS, Docker, Jenkins, Git, Jira, Linux, Splunk, Dynatrace

**API Development** – REST APIs, API Design, Integration Infrastructure

**Methodologies** – Agile, Scrum

## PROJECTS

### Communications Capture Pipeline Enhancement (HCL Technologies)

- Designed and implemented a new data ingestion module for the communications capture pipeline using **Java Spring Boot** and **SQS**, capable of processing over **5,000 messages per hour**.
- Developed robust API interfaces to integrate with external communication systems, ensuring secure data transfer and adherence to defined schemas for a large enterprise client.
- Wrote comprehensive unit and integration tests for the new pipeline components, improving code coverage by **30%** and reducing post-deployment bugs.

### Real-time Transaction Monitoring System (HCL Technologies)

- Built a Python-based backend service to ingest and process transaction data from various sources, feeding into an operational dashboard for real-time monitoring.
- Implemented scheduled reporting scripts using **SQL** and **Python** to generate daily summaries of transaction volumes and error rates, used by operations teams.
- Refactored existing database queries in **PostgreSQL**, reducing average query execution time for key operational reports by **22%**.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
