PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Operated and monitored critical **data center facilities systems** and equipment, responding to abnormal conditions to maintain operational stability.
- Managed the uptime and maintenance of **UPS, generators, and electrical distribution systems**, ensuring continuous power supply.
- Provided daily assistance to senior technicians, reading **blueprints and schematics** to assess system working order and operational status.
- Supported the startup, commissioning, and integration of new **electrical equipment and systems** into existing facilities infrastructure.
- Inspected, maintained, and repaired various **data center systems**, including piping and non-critical electrical or mechanical components, to prevent failures.
- Contributed to developing creative approaches to reducing operational costs while improving overall **data center efficiency**, adhering to environmental and safety standards.

SKILLS

Electrical Systems – Electrical Distribution Systems, HV, LV, Protection and Controls, Power Quality, Generators, UPS Systems, Electrical Distribution

Data Center Operations – Facilities Operations, Monitoring Systems, Control Room Operations, System Maintenance, Commissioning, Equipment Startup, Critical Operations

Technical Skills – Blueprints, Schematics, Sequence of Operations, Material Handling, Lifting, Working on Platforms/Ladders

Software & Tools – Linux, Shell Scripting, Cron Jobs, Jira, Confluence

Languages – Python, Java, SQL

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

PROJECTS

Data Center Electrical Systems Monitoring (HCL Technologies)

- Developed and maintained monitoring dashboards for critical **electrical distribution systems** using Python and AWS CloudWatch, providing real-time status updates.
- Automated routine system checks and diagnostic reporting for **HV and LV components** via shell scripting, reducing manual effort by approximately 15%.
- Assisted in the triage and initial response for system alerts related to power quality and protection controls, documenting findings in Jira.

Power Quality Anomaly Detection (MSc Data Analytics Project)

- Analyzed historical power quality data using Python (pandas, NumPy) to identify patterns indicative of system anomalies.
- Built a predictive model in R to flag potential power quality deviations, achieving a **precision of 0.78** on a validation dataset.
- Visualized key power quality metrics and model predictions using **Power BI** dashboards for technical review and reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
