PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented automated Python scripts for data ingestion and ETL processes, reducing manual data preparation time by ~40%.
- Developed and maintained Java Spring Boot microservices, including RESTful APIs for inter-service communication and feature enhancements.
- Managed production support for enterprise applications, responding to P1/P2 incidents and ensuring adherence to strict service-level agreements (SLAs) using **Splunk** and **Dynatrace**.
- Troubleshooted system design issues and operational blockers within data center environments, collaborating with engineering teams to identify root causes.
- Authored standardized technical playbooks and process documentation for the Server Operations team, enabling autonomous issue resolution for common workflows.
- Participated in cross-functional project teams to deliver technical solutions, managing project schedules and fostering stakeholder engagement.

SKILLS

Cloud Platform – Google Cloud Platform, AWS (EC2, S3, Lambda, CloudWatch), Docker

Backend Development – Java, Spring Boot, Python, Shell Scripting, Go, REST APIs, FastAPI

Databases & Data – SQL, PostgreSQL, Oracle, MySQL, Data Warehousing, ETL, Data/Big Data

Operations & Monitoring – Kubernetes, Systems Administration, Troubleshooting, Incident Response, Splunk, Dynatrace, CI/CD, Jenkins, Git

Analytics & Tools – Power BI, Tableau, R, RStudio, pandas, NumPy, scikit-learn, DAX, Power Query, Jira, Confluence

PROJECTS

Automated Production Triage System (HCL Technologies)

- Developed a Python-based system to automatically ingest and parse logs from multiple enterprise applications, identifying recurring error patterns.
- Integrated the system with a notification framework to alert on-call engineers for critical issues, reducing average response time for P1 incidents by 22%.
- Designed a basic dashboard using **Flask** to visualize incident trends and system health metrics for the production support team.

Data Pipeline Optimization for Analytics (MSc Project)

- Engineered a data pipeline using **Python** and **Pandas** to extract, transform, and load data from disparate sources into a data warehouse.
- Built interactive **Power BI** dashboards to visualize key performance indicators for business stakeholders, enabling faster data-driven decision-making.
- Applied **SQL** and **DAX** for data modeling and report creation, ensuring data integrity and report accuracy.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
