PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed scalable data pipelines and ETL/ELT architectures using **Python** and **SQL** on **AWS**, processing approximately 5,000 events per second during peak hours.
- Contributed to the development and optimization of data infrastructure and data models for an enterprise resource planning (ERP) system, ensuring consistent data integrity across integrated modules.
- Partnered with business analysts and operations teams to gather requirements for a financial-services dashboard, translating evolving analytics needs into actionable technical data solutions.
- Transitioned investigative prototypes and metrics into stable, production-grade reporting environments, working closely with data scientists to ensure robust data pipelines.
- Advocated for data quality by authoring technical design documents, conducting code reviews for Java Spring Boot services, and resolving complex bugs.
- Managed change-control processes for system configuration updates and post-go-live support across interconnected enterprise business systems, coordinating UAT with stakeholders.

SKILLS

Data Engineering & ETL – Data Pipelines, ETL, ELT, Data Modeling, Data Warehousing, SQL, Python, Java, AWS Data Services, Spark, Data Integration

Programming Languages – Python, Java, SQL, R

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Databases – PostgreSQL, MySQL, Oracle, NoSQL

BI & Visualization – Power BI, Tableau, DAX, Power Query, Data Visualization

Methodologies & Tools – Agile, Scrum, CI/CD, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

PROJECTS

ERP Data Integration and Reporting Platform

- Developed Python scripts to automate data extraction and transformation from disparate ERP modules and operational platforms, feeding into a central PostgreSQL data warehouse.
- Engineered ETL processes to synchronize data between systems via REST APIs and direct database connections, supporting cross-system integrations and reducing data latency by **~30%**.
- Built and deployed interactive dashboards in **Power BI** for business stakeholders, visualizing key performance indicators and operational metrics derived from the integrated data.

Automated Financial Transaction Monitoring System

- Designed and implemented Java Spring Boot microservices to ingest and process high-volume transaction data streams from financial operations, performing real-time validation.
- Developed automated alerting mechanisms using Python and SQL queries against a PostgreSQL database, identifying and flagging approximately **2,800** failed or stalled transactions per week for operational triage.
- Integrated monitoring tools like **Splunk** and **Dynatrace** for real-time performance tracking and incident response within the transaction processing environment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
