PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Led the technical investigation and resolution of complex escalations for **identity management** and **authentication pipeline failures** within enterprise advertising ecosystems, reducing critical incident response times by **18%**.
- Acted as the primary technical contact for enterprise customers during **passwordless authentication** rollouts, troubleshooting and supporting the implementation of **Passkey technology** (WebAuthn/FIDO2).
- Partnered with **Product Engineering** and **Trust & Safety** teams to identify systemic vulnerabilities in authentication stacks, routing precise bug reports and advocating for infrastructure-level fixes.
- Developed and implemented **Python scripts** for automating data ingestion and ETL processes for operational reporting, handling approximately **5,000 records** per batch job.
- Designed and deployed **REST APIs** using **Java Spring Boot** for cross-service data exchange, incorporating request validation and circuit-breaker patterns to enhance system resilience.
- Analyzed system logs and API payloads using **Splunk** and **Dynatrace** to debug complex authentication flows and token exchanges for internal and external stakeholders.

SKILLS

Authentication & Security – OAuth2, SAML, SSO, Identity and Access Management (IAM), WebAuthn, FIDO2, Passkey, System Logs, API Payloads, Token Exchange

Programming Languages – Python, Java, SQL, C++

Backend Development – Spring Boot, REST APIs, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Data Analysis & BI – SQL, MySQL, PostgreSQL, Oracle, Data Analysis, Data Warehousing, Power BI, DAX, Power Query, Tableau, R, pandas, NumPy

Enterprise Systems – ERP integration, Change Management, Jira, Confluence

PROJECTS

Enterprise Authentication System Debugging (HCL Technologies)

- Developed a diagnostic tool in **Python** to automatically parse and correlate authentication logs from multiple sources (e.g., **SAML** assertions, **OAuth2** token validation), reducing manual triage time by **40%**.
- Implemented real-time monitoring of **SSO** token exchange processes using **Splunk**, creating alerts for anomalies and potential security exposures.
- Collaborated with cross-functional operations teams to gather requirements for the diagnostic tool, ensuring it addressed key pain points in troubleshooting authentication issues.

Customer Identity & Access Management Dashboard (MSc Project)

- Designed and built an interactive **Power BI** dashboard to visualize user access patterns and authentication success/failure rates for a simulated enterprise environment.
- Developed complex **DAX measures** to calculate key metrics such as failed login attempts per hour and account lockout rates, providing actionable insights to stakeholders.
- Performed data modeling and ETL using **Power Query** on a dataset of **~150,000** user access records to prepare data for visualization.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
