PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **distributed network modelling systems** in **Java Spring Boot**, focusing on enhancing system reliability and data processing efficiency for enterprise clients.
- Authored **Python scripts** to automate data ingestion and ETL processes, reducing manual data handling efforts by approximately **30%** for internal reporting functions.
- Designed and implemented **REST APIs** for seamless integration between disparate enterprise systems, facilitating cross-system data flows and improving operational visibility.
- Managed production environments for critical financial operations dashboards, performing **incident response** and **SLA management** for P1/P2 issues using **Splunk** and **Dynatrace**.
- Refactored complex **SQL queries** across **PostgreSQL** and **MySQL** databases to optimize data retrieval performance for analytical reporting, cutting execution times by an average of **22%**.
- Participated in code reviews for peer developers, ensuring adherence to **best practices**, code quality, and testability standards within an **Agile/Scrum** framework.

SKILLS

Languages – Java, Python, SQL, C++

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Methodologies – Agile, Scrum, CI/CD

Data Analysis & BI – Power BI, Tableau, DAX, Power Query

PROJECTS

Distributed System Performance Monitoring (HCL Technologies)

- Engineered a Python-based monitoring agent that collected and transmitted real-time performance metrics from distributed services to a central logging platform, capturing approximately **5,000 data points per minute**.
- Developed automated alerting mechanisms in **Java Spring Boot** to notify operations teams of system anomalies, reducing critical incident response times by an average of **18%**.
- Integrated system health checks and resource utilization data into a consolidated dashboard, providing stakeholders with a clear overview of network stability and performance trends.

Network Traffic Analysis and Anomaly Detection (MSc Project)

- Built a data pipeline using **Python** and **pandas** to process large network traffic logs, transforming raw data into structured feature sets for analysis.
- Trained a **scikit-learn** anomaly detection model on the processed data, identifying unusual traffic patterns with a precision of **0.78** and recall of **0.65** on a held-out test set.
- Developed interactive **Power BI** dashboards to visualize network activity and highlight detected anomalies, aiding in the interpretation of model outputs for non-technical stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
