PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed distributed software systems for routing hardware, abstracting complex networking into manageable services with a focus on resilience and maintainability for an enterprise routing platform.
- Managed and prioritized project tasks in a self-directed manner, contributing to the development of a modern, scalable, and highly reliable distributed architecture for a core networking solution.
- Contributed to qualification, documentation, and production monitoring efforts, ensuring high standards for code quality and system reliability within the Distributed Software Defined Networks team.
- Clarified ambiguities in project requirements and proactively assisted the team in resolving technical challenges across multiple areas of the software-defined networking stack.
- Collaborated with cross-functional teams and partners to align timelines and coordinate efforts for assigned project components within a large-scale distributed systems environment.
- Developed **Python** scripts to automate data processing and reporting tasks, improving efficiency for operational analytics within the HCL enterprise systems support team.

SKILLS

Core Technologies – Go, Java, Python, Spring Boot, REST APIs, SQL

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Networking & Distributed Systems – Software Defined Networking (SDN), Distributed Systems, Internet Routing, Router/Switch Telemetry, Cloud-Native Architectures, Containerisation

Development Practices – CI/CD, Jenkins, Git, Code Reviews, Agile/Scrum, Jira, Confluence

Operating Systems & Observability – Linux, Shell Scripting, Splunk, Dynatrace

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

In-House SDN Controller Development (HCL Technologies)

- Developed core components of an in-house Software Defined Networking controller using **Java Spring Boot**, focusing on abstracting hardware functionalities into manageable services.
- Implemented **REST APIs** for inter-service communication and configuration management within the SDN ecosystem, supporting a team of 5 engineers.
- Authored detailed technical documentation and runbooks for the SDN controller, facilitating smoother integration and onboarding for downstream teams.

Automated Network Telemetry Pipeline (HCL Technologies)

- Built a **Python** data pipeline to ingest and process network telemetry data from router and switch devices, parsing logs to identify performance bottlenecks.
- Integrated the pipeline with **AWS S3** for data storage and scheduled batch processing using cron jobs on Linux instances, handling approximately 50 GB of log data daily.
- Developed basic alerting mechanisms using **Splunk** queries to notify operations teams of critical network events identified by the telemetry analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
