PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Authored **Python** scripts to automate data ingestion and transformation for internal analytics platforms, reducing manual processing time by approximately **40%**.
- Developed and maintained **Java Spring Boot** REST APIs for cross-service communication, handling an average of **1,500 requests per minute** during peak hours.
- Contributed to the design and implementation of **network infrastructure** solutions, focusing on improving data flow efficiency and reliability for wide area networks.
- Participated in code reviews for a team of 5 engineers, ensuring adherence to **style guidelines**, code accuracy, and optimal testability.
- Triaged and debugged production issues across distributed systems, analyzing the impact on **hardware**, **network**, and service operations to resolve incidents.
- Documented system architecture and operational procedures for network services, adapting content based on product updates and user feedback for improved knowledge sharing.

SKILLS

Backend Development – Java, Spring Boot, Python, Go, Kotlin, C++, REST APIs, Flask, FastAPI

Frontend Development – Angular, TypeScript, JavaScript, HTML, CSS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Linux

Data & Analytics – SQL, PostgreSQL, MySQL, Oracle, Power BI, Tableau, pandas, NumPy, scikit-learn, R

DevOps & Tools – Git, Jenkins, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Network Data Flow Optimization Service

- Engineered a **Python**-based service to monitor and optimize data flow across critical network segments, identifying and mitigating bottlenecks that impacted latency by up to **15%**.
- Implemented real-time data collection and analysis using **AWS CloudWatch** metrics and integrated with a custom alerting system to notify operations teams of potential network disruptions.
- Developed comprehensive documentation and provided training to network operations staff on the service's functionality and best practices for incident response.

Automated Network Configuration Validation

- Built a **Python** utility to automate the validation of network device configurations against defined standards, reducing manual configuration review time by an estimated **60%**.
- Integrated the validation script into a **Jenkins** CI/CD pipeline, enabling automated checks on configuration changes before deployment to production network devices.
- Designed a reporting module to summarize validation results, highlighting discrepancies and providing actionable insights for network engineers.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
