+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for inter-service communication, handling an average of 500 requests per minute.
- Automated data extraction and transformation tasks using **Python scripting**, reducing manual effort for scheduled reporting by approximately 15 hours per week.
- Managed production incidents and SLA adherence for enterprise applications, performing root cause analysis and leading resolution efforts for P1/P2 issues.
- Optimized **SQL queries** across PostgreSQL and Oracle databases for analytical reporting, decreasing data retrieval times by an average of **30%**.
- Contributed to CI/CD pipelines using **Jenkins** and **Git** for automated builds and deployments, improving deployment frequency for feature branches.
- Supported and integrated with enterprise **ERP systems**, coordinating change management processes and UAT for system configuration updates.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

Methodologies – Agile, Scrum

Domain – Enterprise Systems Support, Data Analytics, Network Traffic Engineering Concepts

PROJECTS

Network Traffic Optimization Framework

- Engineered a Python-based framework to analyze network traffic patterns and identify potential bottlenecks in large-scale distributed systems.
- Developed data processing pipelines using **pandas** to ingest and transform logs from various network devices, preparing data for analysis.
- Implemented algorithms for basic traffic flow prediction, simulating routing adjustments to assess potential performance improvements across simulated network segments.

Real-time Data Dashboard for System Performance

- Designed and built an interactive dashboard using **Power BI** to visualize key performance indicators for enterprise applications.
- Developed **DAX measures** and data models to aggregate metrics related to system latency, error rates, and resource utilization.
- Integrated with operational monitoring tools to provide near real-time updates, enabling faster identification of performance degradation for a 10-person operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
