PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Debugged and resolved **network latency** and **packet loss** issues for enterprise clients by analyzing **traceroute** and **tcpdump** captures on **AWS** infrastructure.
- Developed **Python** scripts to automate the generation of **operational reports**, reducing manual effort by an estimated **15 hours per week** for the financial services operations team.
- Engineered **Java Spring Boot** REST APIs to facilitate data exchange between interconnected enterprise systems, supporting critical integration workflows for an ERP platform.
- Managed and responded to **P1/P2 incidents** for production enterprise applications, adhering to strict **SLA management** and documenting root causes in **Jira**.
- Collaborated with **business analysts** and operations teams to gather requirements for enhancements to a **payments operations dashboard**, ensuring regulatory and **GDPR** awareness.
- Implemented **CI/CD pipelines** using **Jenkins** and **Git** for automated testing and deployment, improving code review efficiency for a team of **4 engineers**.

SKILLS

Cloud & Networking – AWS, Google Cloud Platform, EC2, S3, Lambda, CloudWatch, traceroute, mtr, tcpdump, Wireshark, Linux, Shell Scripting

Programming Languages – Python, Java, C++, Go, R

Backend Development – Spring Boot, REST APIs, Docker, Flask, FastAPI

Databases & Data Analysis – SQL, PostgreSQL, MySQL, Oracle, pandas, NumPy, scikit-learn, DAX, Power Query, Data Modelling

Tools & Methodologies – Jenkins, Git, Jira, Confluence, Agile, Scrum, Splunk, Dynatrace

Domain Knowledge – Financial Exchange Industry Concepts, Distributed Systems, Network Troubleshooting, Technical Documentation, Incident Response, Change Management

PROJECTS

Network Performance Analysis Tool (HCL Technologies)

- Developed a **Python**-based tool to analyze **packet capture** files, automatically identifying common patterns of **network latency** and packet loss for critical financial service workloads.
- Integrated **traceroute** and ping utilities into the tool to correlate network path issues with observed performance degradation, reducing initial troubleshooting time by **~30%**.
- Created a dashboard interface using basic web technologies to visualize network metrics and identify potential bottlenecks for internal operations teams.

Automated Transaction Reconciliation System (MSc Project)

- Built a data pipeline using **Python** and **SQL** to automate the reconciliation of transaction data between two disparate systems, processing approximately **50,000 records daily**.
- Designed and implemented **Power BI dashboards** to visualize reconciliation discrepancies, providing clear insights into data integrity issues for stakeholders.
- Wrote comprehensive technical documentation and a user guide detailing the system's architecture and operational procedures, simulating production deployment support.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
