## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Diagnosed and troubleshooted **data center blockers** impacting supply chain software stack operations for Google Server Operations, leading to swift resolution of workflow execution issues.
- Designed and iterated on **internal tools and automated frameworks** to streamline the issue management life-cycle, reducing manual intervention by an estimated **30%**.
- Developed standardized **technical playbooks and processes** that enabled the Server Operations team to autonomously manage and resolve common issues.
- Partnered with **Engineering and Server Operations stakeholders** to investigate and fix fundamental root causes of negative business outcomes, improving system stability.
- Managed project schedules and timelines for internal tooling improvements, fostering engagement with **cross-functional partners** across multiple teams.
- Contributed to a culture of continuous improvement by analyzing performance metrics and identifying areas for **operational excellence** in data center workflows.

## SKILLS

**Cloud Platform** – Google Cloud Platform, AWS, EC2, S3, Lambda, CloudWatch

**Programming & Scripting** – Python, Java, Shell Scripting, C++, Go, JavaScript

**Backend Development** – Spring Boot, REST APIs, Node.js, NestJS, FastAPI

**Databases & Data Management** – PostgreSQL, Oracle, MySQL, SQL, Data Warehousing, Kubernetes, SAP

**Operations & Support** – Troubleshooting, System Design, Incident Management, Change Management, Production Support, SLA Management, Technical Consulting

**Tools & Methodologies** – Jira, Confluence, Git, Jenkins, Docker, Agile, Scrum, Machine Learning, MLOps, Data Analytics, Power BI, Tableau

## PROJECTS

### Internal Tooling for Operations Triage

- Developed a Python-based application to automate the initial triage of operational issues reported by the Server Operations team, integrating with **Jira and Splunk**.
- Designed a modular framework for the tool that allowed for the addition of new diagnostic checks and automated remediation scripts, improving resolution speed by an average of **25%**.
- Created comprehensive **user documentation and training materials** for the operations team, enabling them to effectively utilize the new triage system.

### Automated Data Pipeline for Performance Monitoring

- Engineered a **Python data pipeline** to ingest and process operational metrics from distributed systems, feeding into a custom monitoring dashboard.
- Implemented data validation and cleaning steps using **pandas and SQL**, ensuring data accuracy for performance analysis and SLA tracking.
- Designed RESTful APIs using **Flask** for other internal systems to consume processed performance data, facilitating cross-service integration.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
