PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Assessed customer impact and resolved escalations by diagnosing and remediating **VMware workloads** on Google Cloud Platform products, reducing average resolution time by **18%**.
- Gathered and analyzed technical troubleshooting evidence, including **packet traces** and **OS statistics** across network, memory, processing, and I/O systems to diagnose and resolve complex VMware deployments.
- Served as a subject matter expert for internal stakeholders in engineering and sales, and external partners, to overcome technical deployment obstacles and improve **VMware on GCP** solutions.
- Collaborated with Site Reliability Engineering teams to drive high-quality production environments and respond to outages, minimizing customer impact through rapid diagnosis.
- Advocated for customer issues across cross-functional teams, contributing to **Supportability Engineering** initiatives that improved product quality and reduced contact rates by an estimated **15%**.
- Developed and maintained **Python scripts** for automation of data ingestion and ETL processes, reducing manual effort for the operations team by approximately **10 hours per week**.

SKILLS

Cloud Platforms – Google Cloud Platform, AWS (EC2, S3, Lambda, CloudWatch)

Virtualization – VMware vSphere (ESXi, vCenter), vSAN, NSX-T, HCX, Horizon VDI, vRealize Automation, vRealize Operations, Site Recovery Manager, NSX Enterprise Features, NSX Load Balancer, vCloud Suite

Programming Languages – Python, Java, SQL, Shell, JavaScript, C++, C

Infrastructure & Operations – Kubernetes, Docker, Linux, Jenkins, Git, Splunk, SolarWinds, TrendMicro, F5, Veeam, Zerto

Databases & Data Processing – PostgreSQL, MySQL, Oracle, Power Query, DAX

Frameworks & Technologies – Spring Boot, REST APIs, FastAPI

Methodologies – Agile, Scrum, Site Reliability Engineering (SRE)

PROJECTS

VMware Environment Monitoring and Automation

- Developed a Python-based monitoring solution that integrated with **Splunk** and **CloudWatch** to track key performance indicators for VMware environments on AWS, reducing manual log analysis time by **40%**.
- Automated routine system checks and alert configurations using **Linux shell scripting** and **cron jobs**, ensuring timely notification for over 50 critical system parameters.
- Built REST APIs using **Java Spring Boot** to facilitate data exchange between the monitoring system and incident management tools, streamlining the escalation process.

Cloud Infrastructure Performance Analysis Dashboard

- Designed and implemented interactive dashboards using **Power BI** to visualize performance metrics for virtualized compute infrastructure on AWS.
- Developed complex **DAX measures** and performed data modeling using **Power Query** to aggregate and analyze data from multiple sources, enabling clearer insights into resource utilization and bottlenecks.
- Collaborated with operations teams to define reporting requirements, delivering actionable insights that supported capacity planning and cost optimization efforts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
