PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Power BI dashboards**, translating complex people data into actionable insights for HR Business Partners and senior leaders, informing strategic workforce planning and addressing key organizational challenges.
- Engineered **SQL queries** across disparate HR systems (e.g., Workday, Greenhouse) to consolidate and analyze workforce data, identifying key trends in attrition and hiring patterns for revenue-generating teams.
- Crafted clear, compelling narratives and recommendations from intricate people data, effectively communicating findings to executive and leadership audiences to influence business decisions.
- Partnered with HR Business Partners to proactively analyze strategic areas like retention and organizational health, using data to identify emerging risks and opportunities for a **global sales organization**.
- Designed and implemented rapid 'v0.5' analytical solutions from front-line needs, then collaborated with the broader People Analytics team to refine and productionize these insights for broader adoption.
- Automated data extraction and reporting processes using **Python scripting**, reducing manual effort by approximately 15 hours per week and improving data accuracy for headcount and performance metrics.

SKILLS

Analytics & BI Tools – Power BI, Tableau, Excel, Google Sheets, Grafana BI

Data Analysis & Modeling – SQL, DAX, Data Warehousing, Statistical Analysis, Time-Series Analysis, A/B Testing

Programming & Scripting – Python, R, pandas, NumPy, scikit-learn

HR Systems & People Data – Workday, Greenhouse, Talent Acquisition Platforms, L&D; Platforms, Total Rewards

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker

Development Practices – REST APIs, Git, Jenkins, Agile/Scrum

Data Visualization & Storytelling – Dashboard Development, Executive Presentations, Business Insights

PROJECTS

Workforce Attrition Analysis Dashboard (HCL Technologies)

- Developed an interactive **Power BI dashboard** to visualize employee attrition trends across various departments and tenure levels, enabling proactive retention strategy development for an enterprise client.
- Extracted and transformed data from HRIS and operational databases using **SQL and Power Query**, creating a unified dataset for analysis and reporting on key attrition drivers.
- Presented analytical findings and dashboard insights to HR stakeholders, facilitating data-informed discussions around employee retention initiatives and identifying at-risk employee segments.

Sales Performance & Hiring Analytics (HCL Technologies)

- Built **Python scripts** to automate the aggregation of sales performance metrics and hiring data from multiple internal systems, streamlining the reporting process for sales leadership.
- Analyzed hiring funnel data using **SQL and pandas** to identify bottlenecks and improve time-to-hire metrics for critical sales roles, supporting a 10% increase in recruitment efficiency.
- Created ad-hoc reports and visualizations to support strategic workforce planning for the go-to-market organization, directly informing hiring forecasts and team structure adjustments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
