PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented end-to-end product features, including **Java** backend services and **Flutter** mobile applications, for a new fintech platform.
- Built and shipped **Flutter** applications targeting both **iOS** and **Android**, integrating with established design systems and component libraries.
- Developed clean, maintainable **Java** microservices and **REST APIs** deployed on **AWS**, focusing on distributed backend concerns like idempotency and failure handling.
- Contributed to CI/CD pipelines for both backend and mobile deployments, ensuring smooth integration and release cycles.
- Collaborated with product, design, and AI engineering teams to translate requirements into reliable, production-ready features in a **0→1** startup environment.
- Integrated **AI capabilities** into user-facing workflows, accelerating development and enhancing product functionality.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Microservices, AWS, Distributed Systems, Idempotency, Failure Handling

Frontend Development – Flutter, Mobile (iOS & Android), Web, Component Libraries, Design Systems

DevOps & CI/CD – AWS, Jenkins, Git, Docker, Cloud-Native Environments

Product & Engineering – Full-Stack Development, End-to-End Ownership, Startup Environment, 0→1 Development, AI-Assisted Development, Security-First Mindset, Compliance Considerations

Data & Integration – API Design, Data Modeling, Application State Management, AI/ML Integration

PROJECTS

Fintech B2B Credit Risk Platform

- Developed core **Java** backend services for a new fintech platform focused on B2B credit risk assessment and payment terms.
- Built initial **Flutter** mobile interfaces for the Grand Profile product, enabling businesses to view credit insights and payment data.
- Designed and implemented **REST APIs** for data exchange between backend services and frontend applications, ensuring reliable data flow.

AI-Enhanced Customer Onboarding Flow

- Engineered a Python-based data pipeline to extract and process customer transaction data for an **AI** risk-scoring model, handling ~5,000 records per hour.
- Integrated an **AI model** (scikit-learn) into the onboarding workflow to provide early risk signals, achieving ~0.82 AUC on a simulated dataset.
- Developed internal documentation and scripting to streamline the onboarding process for pilot customers, reducing manual configuration time by approximately 30%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
