PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Defined and executed translational medicine study strategies, interpreting preclinical data to align with therapeutic program objectives and regulatory expectations.
- Developed and validated **biomarkers** for assessing drug response and understanding mechanism of action in both animal models and patient studies.
- Managed relationships with external **Contract Research Organizations (CROs)**, ensuring high-quality and timely execution of complex experimental programs.
- Initiated investigations into new therapeutic areas, incorporating **cutting-edge technologies** to directly support preclinical and clinical development.
- Synthesized and communicated preclinical and clinical biomarker study results to support key program decision-making for asset readiness for clinical development.
- Contributed to the preparation of non-clinical sections of key regulatory documents, including protocols and Investigator's Brochures, facilitating pre-IND meetings.

SKILLS

Drug Discovery & Development – Translational Medicine, Biomarker Discovery, Assay Development, Preclinical Studies, Clinical Trial Support, Mechanism of Action, IND Supporting Documentation, Regulatory Strategy

Project & Partner Management – External Partner Management, CRO Management, Vendor Budgets, Stakeholder Management, Cross-functional Teams, Scientific Guidance, Program Evaluation, Team Leadership

Data Analysis & Interpretation – Data Interpretation, Scientific Findings Presentation, Strategic Plans, Experimental Programs, Scientific Rigor, Decision Making, Quality Management Systems

Technical Skills – Python, Java, SQL, Spring Boot, AWS, Linux, Git, Jenkins, Docker, Splunk, Dynatrace, Power BI, Tableau, R, scikit-learn

Domain Knowledge – Biology, Biochemistry, Immunology, Biological Engineering, Healthcare, Therapeutic Programs, Disease Areas

PROJECTS

Translational Strategy for Novel Therapeutic Agent

- Designed and implemented a translational strategy for a novel therapeutic agent, focusing on biomarker discovery and validation for early-stage clinical trials.
- Managed external CROs for the execution of key preclinical studies, including pharmacokinetic and pharmacodynamic assessments, ensuring adherence to strict timelines and quality standards.
- Interpreted complex data sets from in vivo and in vitro experiments, presenting findings and strategic recommendations to internal R&D; leadership to guide program progression.

Biomarker Development for Oncology Program

- Developed and validated a panel of **biomarkers** to assess patient response and mechanism of action for an oncology drug candidate, utilizing **Python** and **SQL** for data analysis.
- Collaborated with clinical development teams to integrate biomarker plans into study protocols and prepare necessary documentation for regulatory submissions.
- Assessed and incorporated new assay technologies to improve the sensitivity and specificity of biomarker measurements, enhancing the scientific rigor of the translational program.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
