PROJECTS

Marketing Performance Dashboard Suite (MSc Project)

- Developed a comprehensive suite of **12 interactive dashboards** in **Power BI** to visualize key marketing performance indicators (KPIs) including CAC, LTV, and ROAS across various acquisition channels.
- Engineered ETL processes using **Power Query** to clean and transform data from disparate sources like Google Analytics and CSV exports, ensuring data accuracy for reporting.
- Implemented complex **DAX measures** to calculate conversion rates, campaign ROI, and customer lifetime value, enabling stakeholders to gain deeper insights into marketing effectiveness.

Customer Journey Attribution Analysis (HCL Technologies)

- Constructed **SQL queries** against a financial services client's transaction database to extract user interaction data across multiple marketing touchpoints.
- Analyzed user behavior patterns to build a multi-touch **attribution model**, identifying the relative impact of SEM, paid social, and email campaigns on customer acquisition.
- Presented findings and recommendations on optimizing channel spend to the client's business analysts, contributing to a refined marketing strategy.
