PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Engineered **Python** data pipelines on **AWS Lambda** to ingest and transform raw connectivity data, processing approximately 5,000 events per second during peak hours.
- Developed and deployed **FastAPI** microservices to expose key business insights, integrating with internal data warehousing solutions and supporting an average of 15 concurrent requests.
- Led data transformation initiatives using **DBT**, creating modular and maintainable SQL models within our data warehouse to structure data for analytical use cases.
- Optimized relational **SQL** database schemas and implemented strategic indexing on large datasets, reducing analytical query execution times by an average of 30% for core reporting.
- Automated data validation and cleansing processes using **Python** scripts, ensuring high standards of data integrity and security across the data ecosystem.
- Managed CI/CD pipelines using **Jenkins** and **Git** for data workflow deployments, facilitating code reviews and ensuring smooth integration of new data transformations.

SKILLS

Data Engineering – ETL, ELT, DBT, Data Modelling, Cloud Warehousing, Data Validation, Data Integrity, Data Reliability.

Backend Development – Python, FastAPI, REST APIs, Microservices, SQL.

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), GCP, BigQuery.

Databases – PostgreSQL, MySQL, Oracle, SQL.

DevOps & CI/CD – Jenkins, Git, Docker, Linux Shell Scripting.

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, R, Pandas, NumPy, Scikit-learn.

PROJECTS

Scalable Data Pipeline for Connectivity Analytics (HCL Technologies)

- Designed and implemented a **Python**-based ETL pipeline on **AWS** to ingest raw eSIM connectivity logs from multiple sources, processing over 10 TB of data weekly.
- Developed **DBT** models to transform raw log data into structured tables for performance analytics, including user session duration and data consumption metrics.
- Integrated automated data quality checks within the pipeline using custom **SQL** scripts, reducing data integrity issues reported by the analytics team by 45%.

Real-time Transaction Insights API (HCL Technologies)

- Built a **FastAPI** service to expose aggregated transaction data, enabling internal teams to access near real-time operational insights.
- Developed **SQL** queries against a PostgreSQL database to retrieve and format data for API responses, optimizing for p95 latency below 200ms.
- Implemented basic API authentication and rate limiting to ensure secure and controlled access for internal stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
