PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for inter-service communication, handling approximately **4,000 requests per minute** during peak hours.
- Automated data extraction and transformation processes using **Python scripting**, reducing manual effort for scheduled reporting by an estimated **15 hours per week**.
- Managed incident response and SLA adherence for critical enterprise applications, resolving P1/P2 issues within a **4-hour SLA** using **Splunk** and **Dynatrace** for root cause analysis.
- Executed complex **SQL queries** across **PostgreSQL** and **Oracle** databases for data validation and ad-hoc analysis, supporting business analysts in UAT phases.
- Implemented CI/CD pipelines using **Jenkins** and **Git** for automated builds and deployments, improving release cycle efficiency for a team of **8 engineers**.
- Contributed to the development of an internal **ML feature pipeline**, focusing on data ingestion and transformation for downstream model training using **Python** and **pandas**.

SKILLS

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query, RStudio

Monitoring & Observability – Splunk, Dynatrace

Methodologies – Agile, Scrum

PROJECTS

Enterprise Systems Integration Hub (HCL Technologies)

- Designed and implemented **REST APIs** using **Java Spring Boot** to connect disparate enterprise systems, including ERP modules and operational platforms.
- Developed data transformation scripts in **Python** to facilitate cross-system data flows between **PostgreSQL** and **Oracle** databases, ensuring data consistency for reporting.
- Managed change control processes for system configuration updates and coordinated UAT across interconnected systems, supporting a smooth post-go-live transition for **3 core modules**.

Predictive Maintenance Alerting System (MSc Project)

- Engineered a data pipeline using **Python** and **pandas** to ingest sensor data from simulated industrial equipment, processing approximately **10,000 data points per hour**.
- Developed a **scikit-learn** classification model to predict equipment failure, achieving an **AUC of 0.83** on a held-out test set derived from historical operational data.
- Built an interactive **Power BI** dashboard to visualize equipment status, alert thresholds, and model predictions for operational stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
