PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for enterprise systems, handling approximately 4,000 requests per day.
- Automated data extraction and transformation tasks using **Python scripting**, reducing manual reporting effort by 15 hours per week for the operations team.
- Managed production incidents for critical enterprise applications, contributing to the resolution of over 50 P1/P2 tickets with a focus on SLA adherence.
- Designed and implemented **Power BI dashboards** to visualize key operational metrics, enabling stakeholders to track performance trends more effectively.
- Wrote and optimized **SQL queries** across PostgreSQL and Oracle databases for data validation and ad-hoc analysis, supporting business requirements for financial data reporting.
- Collaborated with cross-functional teams, including business analysts and operations staff, to gather requirements and support User Acceptance Testing for system updates.

SKILLS

Programming Languages – Java, Python, SQL, R

PROJECTS

Financial Operations Dashboard Enhancement (HCL Technologies)

- Developed new modules for a **payments operations dashboard** using **Java Spring Boot** to improve transaction monitoring capabilities, handling ~3,200 failed payment messages weekly.
- Automated the generation of daily reconciliation reports via **Python scripts** that queried **PostgreSQL**, reducing manual processing time by 8 hours per cycle.
- Implemented enhanced alerting mechanisms within the dashboard, integrating with **Splunk** to notify operations teams of critical transaction flow issues.

ERP Data Integration & Reporting Platform (MSc Project)

- Designed and built a data model in **Power BI** to integrate disparate data sources from ERP systems for enhanced business intelligence.
- Developed interactive dashboards with **DAX measures** and **Power Query** transformations to present key performance indicators to simulated business stakeholders, enabling clearer decision-making.
- Performed exploratory data analysis using **R** to identify trends and anomalies within the integrated datasets, providing actionable insights for process improvement.
