PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed end-to-end **AI-powered automation workflows** using Python to streamline lead generation and client acquisition, processing over **5,000 leads** per week.
- Engineered scalable **data pipelines** with Python and SQL to transform raw data inputs into CRM-ready insights, reducing manual data entry by an estimated **30%** for the operations team.
- Implemented robust **web scraping solutions** in Python, effectively managing rate limits and dynamic platform behaviors to extract data from over **50 distinct online sources**.
- Built and maintained **document processing pipelines** incorporating **OCR** for scanned documents and structured data extraction from digital PDFs, improving data availability for downstream analytics by approximately **40%**.
- Integrated automation systems with **CRM platforms**, ensuring seamless data synchronization and enhancing pipeline visibility for leadership through automated reporting.
- Designed and deployed **data cleaning processes**, including deduplication and enrichment logic, which improved lead accuracy by **15%** and reduced client acquisition friction.

SKILLS

Automation & AI – AI Automation Workflows, Web Scraping, OCR, Document Parsing, Data Extraction, Data Structuring, Data Enrichment, Deduplication, Fuzzy Matching, Entity Resolution, Outreach Automation

Programming & Scripting – Python, SQL, Java, Spring Boot, REST APIs

Data Engineering & Pipelines – Data Pipelines, ETL, Data Transformation, Structured Data Processing, Data Cleaning, Data Warehousing

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Systems Integration & CRM – CRM Integration, System Integration, API Integration, Lead Generation Workflows, Client Acquisition Workflows

Development Practices – Agile/Scrum, CI/CD, Jenkins, Git, Code Reviews, Jira, Confluence

PROJECTS

Intelligent Lead Generation Platform (HCL Technologies)

- Developed a Python-based platform to automate lead generation by scraping industry websites and parsing unstructured data, handling approximately **1,500 new leads** daily.
- Integrated **OCR** capabilities to extract information from scanned client documents, converting them into structured data for the CRM, processing an average of **50 documents** per day.
- Implemented data deduplication and enrichment logic using Python, improving lead quality and reducing manual review time for sales teams by an estimated **25%**.

Automated Client Data Enrichment Service (HCL Technologies)

- Built a service using Python and SQL to extract, clean, and enrich client data from multiple internal and external sources, generating over **10,000 enriched records** per month.
- Developed REST APIs with **Spring Boot** to integrate the enrichment service with existing enterprise systems and a target **CRM platform**, facilitating seamless data flow.
- Designed data validation and quality checks within the pipeline, ensuring a **98% accuracy rate** for enriched client contact information.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
