PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Led technical discovery sessions with strategic enterprise customers to assess current environments and identify adoption opportunities for an AI-enabled platform, translating complex requirements into actionable solutions.
- Designed end-to-end architecture and deployment strategies for regulated enterprise environments, encompassing CI/CD, security, and AI workflows, ensuring alignment with platform capabilities and customer constraints.
- Developed reusable technical accelerators and reference architectures in **Python** and **Java Spring Boot** for common DevSecOps and AI implementation patterns, reducing engagement ramp-up time by an average of **15%**.
- Architected hybrid deployment models for enterprise clients, focusing on **GitLab CI/CD** runners, governance policies, observability tooling, and integration layers with existing systems.
- Contributed to platform evolution by identifying and documenting recurring field challenges and customer-generated feature requests, feeding insights back to the upstream engineering team.
- Collaborated with cross-functional product and engineering teams to refine adoption strategies and ensure scalable, repeatable solutions across a portfolio of enterprise accounts.

SKILLS

Core Engineering – Software Engineering, Platform Engineering, Solutions Architecture, Distributed Systems, APIs, System Design, CI/CD, DevSecOps, AI Workflows, LLM Concepts

Programming & Scripting – Python, Java, Spring Boot, Ruby on Rails, Go, Shell Scripting

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Infrastructure-as-Code, Terraform, Ansible, Helm, Kubernetes

DevOps & CI/CD Tools – GitLab CI/CD, Runners, Pipelines, API Integrations, Jenkins, Git

Databases & Data Handling – SQL, PostgreSQL, MySQL, Oracle, Data Warehousing, ETL, Power Query

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

Data Analytics & BI – Power BI, Tableau, DAX, R, pandas, NumPy, scikit-learn

PROJECTS

Enterprise AI Platform Deployment Accelerator

- Engineered a modular **Python** framework to automate the setup and configuration of AI inference environments on **AWS EC2**, targeting complex enterprise network constraints.
- Developed reusable **Terraform** modules for provisioning secure, isolated environments, including compute, storage, and network access controls, cutting deployment time for proof-of-concepts by **40%**.
- Created comprehensive runbooks and technical guides detailing best practices for integrating customer-specific data sources with the AI platform's feature ingestion pipelines.

Customer DevSecOps Adoption Playbook

- Designed and documented a phased adoption strategy for a strategic enterprise client, focusing on integrating their existing CI/CD pipelines with a new DevSecOps platform.
- Built a proof-of-concept **Java Spring Boot** microservice demonstrating secure API interactions between the client's legacy systems and the target platform, achieving p95 latency below **200ms**.
- Conducted knowledge transfer sessions and provided post-implementation support to the client's internal engineering team, enabling them to manage the new platform independently.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
