PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and enhanced mobile applications using **React Native**, implementing new features for a **digital trading platform**, focusing on performance and user experience.
- Optimized application responsiveness and ensured **real-time user experiences** at scale by integrating **RESTful APIs** and **WebSocket-based services**.
- Collaborated with cross-functional teams, including product and design, to define, design, and deliver innovative **mobile solutions** for a global user base.
- Implemented and improved **data visualization** components based on large and complex datasets, enhancing the presentation of real-time financial information.
- Managed production support for enterprise Java/.NET applications, responding to P1/P2 incidents and maintaining **service level agreements** using Splunk and Dynatrace.
- Automated data extraction and transformation tasks using **Python scripting**, generating scheduled reports for operational analysis across various data sources.

SKILLS

Mobile Development – React Native, JavaScript (ES6+), Redux, Expo, Mobile Performance Optimization, Scalable App Architecture

Backend & APIs – RESTful APIs, WebSockets, Java, Spring Boot, Python, Flask, FastAPI

Data Visualization & Analytics – Power BI, Tableau, DAX, Power Query, R / RStudio, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – SQL, PostgreSQL, MySQL, Oracle

Methodologies & Tools – Agile, Scrum, Jira, Confluence, Linux, Splunk, Dynatrace

PROJECTS

Real-Time Trading Dashboard Development

- Engineered interactive **data visualization** components in **React Native** to display live market data streams, enabling users to track asset performance in real-time.
- Integrated **WebSocket services** to push live price updates and trade executions, ensuring data freshness and responsiveness for a high-volume trading environment.
- Developed a Python data pipeline to aggregate and process transaction data from multiple sources, feeding into the dashboard's analytical backend.

Mobile Application Performance Optimization

- Analyzed and optimized mobile application performance using **React Native** profiling tools, reducing **p95 load times** for key screens by 30%.
- Refactored state management logic using **Redux**, improving application responsiveness and reducing rendering bottlenecks during complex data updates.
- Implemented unit and integration tests using Jest, achieving 85% code coverage for core application modules and ensuring stability during feature development.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
