## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided hands-on **technical support** to enterprise customers integrating with a **usage-based billing platform**, ensuring adoption of best practices and smooth implementation.
- Investigated, debugged, and resolved complex customer-reported integration and product issues using internal **observability tools** and diagnostic scripts, reducing average resolution time by **18%**.
- Managed technical escalations through the **Zendesk ticketing system**, synthesizing clear context and structured feedback for engineering teams to address root causes.
- Collaborated directly with customers via **Slack and email** to troubleshoot and resolve technical blockers, maintaining a **92%** customer satisfaction score for resolved issues.
- Developed internal **Python scripts** and automations to enhance support workflows, decreasing manual data retrieval tasks by approximately **4 hours per week** per support engineer.
- Authored comprehensive **technical documentation** and knowledge base articles for internal teams and customers, improving self-service resolution rates by **15%**.

## SKILLS

**Support & Operations** – Technical Support Engineering, Customer-Facing Engineering, B2B SaaS Support, API Integration Support, Observability Tools, Diagnostic Tools, Ticketing Systems (Zendesk, Front, Pylon), Incident Management, Root Cause Analysis, Customer Satisfaction

**Programming & Scripting** – Python, TypeScript, Ruby, Shell Scripting, Automation Scripting, API Development

**Data & Databases** – SQL, PostgreSQL, MySQL, Oracle, Data Validation, ETL

**Cloud & SaaS** – AWS (EC2, S3, Lambda, CloudWatch), Docker, SaaS Environments, High-Scale SaaS

**Development Tools & Practices** – Git, Jenkins, CI/CD, Code Reviews, Agile/Scrum, Jira, Confluence, REST APIs

**Domain Knowledge** – Usage-Based Billing Platforms, API-Driven Systems, Technical Documentation, Knowledge Base Creation

## PROJECTS

### Customer Integration Automation Tools (HCL Technologies)

- Engineered a suite of **Python scripts** to automate common customer integration tasks for a financial services client's transaction monitoring dashboard, reducing manual setup time by **30%**.
- Developed reusable code modules to interact with the client's internal APIs for data validation and configuration updates, ensuring consistent data flows across disparate systems.
- Created a **command-line interface (CLI) tool** that guided customer technical teams through initial setup and data mapping, improving their onboarding speed and reducing support tickets by **~20%**.

### Support Workflow Optimization Dashboard (MSc Applied Project)

- Designed and built an interactive **Power BI dashboard** to visualize key support metrics, including ticket volume, resolution times, and customer feedback trends from sample data.
- Developed complex **DAX measures** and Power Query transformations to aggregate and analyze simulated support ticket data, providing actionable insights into workflow bottlenecks.
- Presented the dashboard and findings to a simulated product management team, highlighting areas for potential automation and process improvement.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
