PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed secure **Java Spring Boot** microservices for a financial-services client, implementing **REST APIs** with input validation and circuit-breaker patterns to ensure system resilience during peak transaction loads.
- Engineered **Python** scripts to automate data extraction and transformation from disparate sources into a centralized PostgreSQL database, supporting operational reporting and audit trail generation for a key enterprise system.
- Executed security design and technical troubleshooting for **AWS cloud-native applications**, integrating **IAM** policies and **OIDC** authentication flows to secure multi-tenant environments.
- Conducted threat modeling and vulnerability assessments for multiple internal applications, identifying potential security weaknesses and recommending remediation strategies to business stakeholders and development teams.
- Implemented and monitored **Linux** server configurations and scheduled cron jobs for automated data processing tasks, analyzing logs in **Splunk** to resolve production incidents within defined SLA targets.
- Collaborated with business analysts and operations teams to gather security requirements for enhancements to a **payments operations dashboard**, contributing to UAT support and post-implementation triage.

SKILLS

Cloud Environments – AWS (EC2, S3, Lambda, CloudWatch), Public Cloud Concepts

Security Concepts – IAM, Authentication, OIDC, SAML, Vulnerability Assessment, Threat Modeling

Programming Languages – Python, Java, SQL, Bash

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases & Data Platforms – PostgreSQL, MySQL, Oracle, Redshift, Lake Formation, Snowflake, Databricks

DevOps & IaC – Docker, Jenkins, Git, Terraform, CloudFormation

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

PROJECTS

Secure Cloud Service Integration (HCL Technologies)

- Designed and implemented a secure integration layer between an enterprise ERP system and a cloud-based analytics platform using **Python** and **AWS Lambda**, ensuring data integrity and access control.
- Developed **RESTful APIs** with robust error handling and security configurations (**OIDC** token validation) to facilitate secure data exchange for a financial services client.
- Configured **AWS IAM** roles and policies to enforce least-privilege access for services interacting with sensitive customer data, supporting regulatory compliance requirements.

Automated Security Patching Pipeline (MSc Applied Project)

- Created an automated pipeline using **Python** and **Terraform** to identify and apply security patches to a fleet of 50+ virtual machines in a simulated cloud environment.
- Integrated vulnerability scanning tools into the pipeline, flagging systems with critical CVEs and prioritizing patching based on risk severity.
- Generated automated reports detailing patching status and identified vulnerabilities for review by system administrators and security leads.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
