PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed data integration and analysis across disparate enterprise systems, ensuring data consistency for downstream reporting and operational dashboards.
- Engineered extensible data acquisition solutions in **Python** and **Java Spring Boot** to meet functional and non-functional requirements for financial services operations.
- Implemented processes to extract, transform, and distribute data from diverse sources into **PostgreSQL** and **Oracle** databases for analytics and system integration.
- Provided problem-solving expertise and complex analysis of data to develop business intelligence integration designs, supporting operational decision-making.
- Collaborated with cross-functional teams including Product Management, Integration Engineering, and System Admin Teams to deliver integrated software components.
- Worked with geographically distributed teams to build consumable software building blocks, facilitating easier integration with other internal products.

SKILLS

Cloud & Big Data Technologies – AWS (EMR, S3, Glue, Lambda, CloudWatch), Apache Airflow, Big Data Technologies, Databricks, Hadoop, Spark, PySpark, Scala, Athena, RDS, Databricks, Delta Lake, Iceberg

Data Warehousing & Modeling – Data Warehousing, Data Modeling, Data Lake, Data Security, Relational Database

Programming & Scripting – Java, Spring Boot, Python, REST APIs, SQL, PySpark, Scala, R

CI/CD & DevOps – Jenkins, Git, Artifactory, Yaml, Maven, Docker, Infrastructure as Code (Terraform/CloudFormation)

Databases & File Formats – PostgreSQL, MySQL, Oracle, NoSQL, DynamoDB, Parquet, ORC, Avro

Development Tools & Methodologies – Agile/Scrum, Jira, Confluence, AI-assisted developer productivity tools (e.g., GitHub Copilot)

Analytics & BI – Power BI, Tableau, DAX, Power Query, Business Intelligence

PROJECTS

Enterprise Data Integration Platform (HCL Technologies)

- Developed a data integration framework using **Python** and **AWS Lambda** to ingest and process data from multiple enterprise systems, supporting critical operational reporting.
- Designed and implemented ETL pipelines using **AWS Glue** and **Spark** to transform and load data into a centralized **S3** data lake, improving data accessibility for analytics teams.
- Integrated the platform with existing **Java Spring Boot** services via REST APIs, enabling seamless data flow and reducing manual data reconciliation efforts by an estimated **20%**.

Financial Operations Dashboard Enhancement (HCL Technologies)

- Enhanced a payments operations dashboard by building new data acquisition modules in **Java**, enabling real-time monitoring of transaction flows for a financial services client.
- Automated data validation and alerting processes using **Python** scripts and **SQL** queries against **PostgreSQL**, reducing P1 incidents related to data discrepancies by **15%**.
- Collaborated with business analysts to gather requirements for new operational metrics and translated them into actionable dashboard visualizations, improving visibility into payment processing health.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
