PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java 11 microservices** for trade processing, adhering to **event-driven architecture** principles and integrating with **Kafka** for asynchronous communication.
- Developed and maintained **secure, high-quality code** for critical financial applications, ensuring synchronous operation with core systems and **production stability**.
- Analyzed and synthesized **large, diverse data sets**, producing **visualizations and reports** to identify system architecture improvements and hidden operational patterns.
- Automated remediation of recurring system issues through **Python scripting**, reducing manual intervention by an estimated **30%** for the operations support team.
- Contributed directly to code reviews and technical delivery within an **agile team**, partnering with management and stakeholders to meet project timelines.
- Migrated components of an enterprise application to the **AWS ecosystem**, focusing on cloud-native solutions and enhancing application resiliency.

SKILLS

Languages – Java 11, Python, SQL, R

Frameworks & Libraries – Spring Boot, Kafka, Java Messaging System, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – Oracle, PostgreSQL, MongoDB

Cloud & DevOps – AWS, Docker, Kubernetes, Jenkins, Git, CI/CD

Methodologies & Practices – Agile, Microservices Architecture, Event-Driven Development, Performance Tuning, Application Resiliency, Security

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Domain Knowledge – Financial Services Industry IT Systems, Trade Processing, Regulatory Compliance

PROJECTS

Trade Processing Microservices Platform (HCL Technologies)

- Engineered a suite of **Java 11 microservices** to manage trade lifecycle events, integrating with **Kafka** for inter-service communication and building asynchronous processing capabilities.
- Developed **REST APIs** for seamless data exchange between microservices and legacy systems, ensuring robust error handling and implementing **circuit breaker patterns** for improved fault tolerance.
- Containerized microservices using **Docker** for consistent deployment across development and production environments, contributing to the team's adoption of modern deployment practices.

Financial Data Analytics and Reporting Dashboard (MSc Applied Project)

- Designed and built an interactive **Power BI dashboard** to visualize key performance indicators for financial transaction data, consolidating information from multiple sources using **Power Query**.
- Developed complex **DAX measures** to support in-depth analysis of transaction volumes and processing times, enabling stakeholders to identify bottlenecks and optimize workflows.
- Performed data modeling and ETL processes on a dataset of approximately **1.5 million transaction records** to ensure data integrity and facilitate accurate reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
